

PRESS RELEASE

Celebrating the Company's 19th Anniversary, Biznet Continue Making Innovations and Become an Integrated Digital Infrastructure Company in Indonesia

Jakarta, Indonesia, 15 October 2019 – In the momentum of Biznet's 19th anniversary, Biznet is proud to announce that the company has become an integrated digital infrastructure company in Indonesia. As a growing local technology company, Biznet is committed to respond new challenges and people's demand for an integrated digital telecommunication by providing high quality Internet service, Cable TV service in High Definition (HD), which will soon be upgraded to IPTV, as well as Data Center and world-class Cloud Computing service with Biznet Gio Cloud service. Supported by modern infrastructure and The New Biznet Fiber network, Biznet can provide the best technology solutions with much bigger bandwidth capacity to support today's digital lifestyle.

"The fast growing digital technology and lifestyle is forcing us to stay updated with the latest technology trends. As a technology company, we are committed to give solutions for people's needs for a digital technology service to support various activities. Not only developing our service, we also continue to expand our coverage area in more cities in Indonesia, so more people can have proper access to high quality Internet connection and digital technology services" said Adi Kusma, Biznet President Director.

Currently, the length of Biznet Fiber network has reached 33,000 KM throughout more than 110 cities in Java, Bali, Sumatra and Batam. By end of 2019, Biznet network is going to be officially available in Pontianak and Sulawesi, greeting the people of Pontianak and Manado, which will surely be followed by more cities in the near future.

Currently, Biznet is providing super fast Internet services for large, medium, and small-scale businesses, as well as Internet service for home and apartment segments, that customers can choose based on requirements:

- Biznet Dedicated Internet, an Internet service dedicated for large-scale companies or corporation, which offers Internet service packages starting from 30 Mbps at Rp 6,000,000/month. This service offers 24-hour connection to Global Internet and dedicated bandwidth allocation (1:1), ensuring the most reliable network performance at all times.
- Biznet Metronet service, an Internet service for medium-scale companies such as SMB/startups, offering several service packages starting from 50 Mbps at Rp 1,000,000/month.
- Biznet Home service, an Internet service for home and apartment segment with price starting from Rp 300,000/month, offering not only Internet service, but also Internet + Cable TV service in High Definition, giving high quality entertainment for the whole member of the family. Soon, Biznet Cable TV service will be upgraded to Biznet IPTV service.

Aside from network services, data center currently has been considered as one of the key for business parameter, not just considered as an external facility to store information or business operation model. Therefore, we continue to develop our Biznet Data Center service, which is now available in 3 locations including in Jakarta MidPlaza, Biznet Technovillage – Cimanggis, West Java, and Bali Jimbaran. In 2020 Biznet will also launch the fourth data center named Biznet Technocenter Jefferson in Yogyakarta. Aside from being the location of Biznet Data Center, Biznet Technovillage is also an integrated facility that includes Grade A Office Space. Located 35 KM from business Jakarta CBD, built with environmentally-friendly concept based on various green building technologies to reduce waste, Biznet Technovillage is a complete data center facility with the best and modern facilities in Indonesia.

Biznet is also providing Biznet Gio Cloud service, a world class cloud computing service supported by modern data center infrastructure to provide the best cloud computing service that supports business activities. With strong experience on providing IaaS (Infrastructure as a Service), Biznet Gio Cloud is providing GIO Cloud service, a cloud

PT. Supra Primatama Nusantara (Biznet)

MidPlaza 2, 8th Floor. Jl. Jend. Sudirman 10-11. Jakarta 10220 – Indonesia.

computing service that offers infrastructure solution for enterprise based on VMware technology, and NEO Cloud service that was designed to provide cloud computing solution for customers that can be designed and customized based on customer requirements. Same thing with Biznet Data Center service, Biznet Gio Cloud has also certified with PCI-DSS and ISO 27001 that guarantees customer data security.

"Keep making innovations to develop our services has been Biznet's commitment to be able to provide the best for the community. In the age of 19, in the midst of growing digital lifestyle, Biznet ensures that we will continue supporting people's demand and facilitate them with our latest technology, so that gradually we can finally achieve Biznet goals, which is to reduce the digital gap in Indonesia and to be able to connect all the people of Indonesia in many islands. All of our achievements will certainly not happen without the support of all parties including customers, business partners, and media partners in Indonesia," said Adi Kusma.

As an integrated digital infrastructure company in Indonesia, Biznet is also committed to support the country's creative economy, which is currently growing significantly over the years. The growth of creative economy is marked by a significant increase in the total of local startups, where more and more young people choose to build their own businesses by developing their creativity rather than working and becoming employees in private and multinational companies. To establish new business, they need a fast Internet connection to grow their business, marketing their products or offering their service to the public.

In line with the industrial revolution 4.0 era where automation technology is increasing and requires support from sophisticated and modern infrastructure, Biznet as a technology company is taking part to create new innovations that offer the best digital infrastructure through the latest network, The New Biznet Fiber, which can deliver Internet services with much better performance with a much larger bandwidth capacity. This latest network and technology is expected to answer the ever-growing digital demand in Indonesia.

In the moment of Biznet's 19th anniversary, we would also like to express our gratitude for the support given to us throughout the years, including from the government, media friends, business partners, and also our customers all over Indonesia. The given support will continue to strengthen our commitment as well as our motivation to continue making innovations and giving the best services for the people of Indonesia.

About Biznet

Biznet is an integrated digital infrastructure company in Indonesia, provides Internet, Data Center, Cloud Computing and IPTV services. We have a strong commitment to build modern infrastructure to reduce the digital gap between Indonesia and other developing countries.
