

Quarterly Newsletter for Biznet Costumers & Partners

BIZNET NEWS

A dream has become reality

Seasons Greetings

Wishing you all the beauty of the holiday seasons
and peace in the years to come

From the Management and Staff of Biznet Networks

BIZNET[®]

M

erry Christmas and Happy New Year for all of us!

New Year always marks a new phase, new innovations and of course new development. At Biznet we always challenge ourselves to provide you a better and efficient way to communicate. Creating new innovations has become a passion for us towards our goals.

Every development we consider as our achievement in providing a better telecommunication infrastructure.

Adi Kusma

President Director

adi_kusma@biznetnetworks.com

At the end of 2008, America's economic crisis has given an impact to the global world. A lot of companies felt the great impact and go down with the crisis. It is an issue that we all have to face and resolve together. We will not stop our project development and prepare careful planning to deal with the crisis. We will continue expanding our coverage to serve wider market and improving our service. Currently, we have more than 250 buildings connected with our fiber optic networks. Our target in 2009, there would be over 350 buildings connected in Jakarta, Bali, Bandung and Surabaya.

As a company, it is very important to make our operational cost minimal and cut off the unnecessary cost. One of the most important element is to have the best performance and reliable network to support our customers' business and yet in an affordable price.

Biznet ensures our customers' investment in our service would be worth it. Our Broadband Internet service for small medium business users called MetroNET, starting 1 Jan 2009 we will double the capacity without any extra cost. MetroNET 1 Mbps costs Rp. 1,000,000/month and MetroNET 10 Mbps costs Rp. 7,500,000/month, allows you to select variety of access speed, depending on your requirement and budget.

Make sure you choose the right partner to face the economic crisis and to build your company success. With Biznet, we will ensure that you can run your business smoothly and efficiently in time of crisis. We wish your success in 2009.

Biznet in 2008: A dream has become reality

Since its establishment in 2000, Biznet has proven a significant development throughout the years, mostly in 2008. Starting from January 2008 until November 2008 Biznet has connected 75 more buildings with total 247 buildings connected with Biznet Fiber Optic Network by December 2008.

A better telecommunication infrastructure is what the society needs to enhance their digital lifestyle. Every development is an achievement for Biznet, hence we always continue to develop every aspect in our core business to achieve our goals. "We realized that in order to maintain the customer's satisfaction, we should keep innovating and upgrading our service, for example by building a large coverage network to serve wider market, increasing the capacity and having a more trained customer care" conveys Adi Kusma, Biznet President Director.

Biznet has been gradually increasing the capacity of max3 Internet, the broadband internet for home or personal user. In February 2008, max3 Internet capacity increased from 5 Mbps to 10 Mbps. As the demand grows, Biznet sees a big opportunity in serving a reliable internet connection in retail market. In July 2008, Biznet expand the coverage area of max3 Internet to South Jakarta and North Jakarta and opens the first max3 store. In October 2008, Biznet once again increased max3 capacity up to 15 Mbps, it reaffirms max3 position

as the fastest broadband internet in Indonesia. Besides that, in October we celebrated max3 new logo that was redesigned by BD+ADesign. The new logo is believed to show max3 traits that suits our customer.

In July 2008, Biznet showed its commitment towards building a better telecommunication infrastructure in Indonesia by launching Surabaya to become the first Multimedia City. Biznet built around 10 (ten) KM of fiber optic route in Surabaya Central Business District. As of Nov 2008, we have connected 4 buildings in Surabaya such as Intiland Tower, Bumi Mandiri, Graha Pacific and Plaza BII.

Getting on towards the end of 2008, America's economic crisis has given a global impact. Every nation felt the crisis and some of the big companies had collapsed. This crisis is a problem that we all have to solve and choosing the right partner is really crucial. To run your business, a reliable network yet affordable is needed to help you manage your business smooth. Biznet assures you will have a wide selection of service to fit your requirement and budget.

Welcoming 2009, Biznet once again provide you the latest innovation by doubling Biznet MetroNET service capacity with speed up to 10 Mbps. Starting from 1 January 2009, you can get MetroNET 1 Mbps for only Rp.1,000,000. Not just that, for every Biznet Prepaid Voucher purchased you can get a chance to win various prizes.

Husky Energy is an oil company based in Calgary, Canada. In Indonesia, Husky completed the gas sale and purchase agreements for production from the Madura BD Field. As a well known company, Husky is committed to maintain its position as a company that values diversity as fundamental to its business operations. In principle and in practice, Husky promotes an inclusive, respectful work environment where individuals and groups can achieve their full potential. The goal is a creative and healthy workplace where Husky is valued as a vital partner in the community and productivity is maximized.

Husky Energy Indonesia was established in 2005. Nowadays, Husky is preparing to do drilling for mid April 2009, not just that Husky got a new block which is in North Sumbawa. If Husky gets the result which is oil, Husky will start the production and cooperate with the government for the distribution.

As a growing company in Indonesia, the number of Husky employees is 20 people at the moment and they still recruiting

people to join the company. To keep connecting with their Headquarter in Canada, Husky Energy Indonesia needs a reliable networking to guarantee the communication will run smooth. Most of the communication is done through e-mail, so the company needs a fast and secure internet connection.

The internet connection Husky use is dedicated line using fiber optic from Biznet. With bandwidth 2 Mb, the employee is really satisfied with the connection they use in the office. "The reason why our company use Biznet is because the operational need a reliable network and with the employee number keep increasing, we need an internet connection that is fast. The response from the customer care is quick as well, no hassle" says Jogi Dwiputra Aloewie, Husky Energy Information Technology Supervisor.

"Since the first day our company uses Biznet service, the connection is superbly smooth. We always send and receive file that is generally in big sizes, so using the dedicated line service that is delivered via fiber optic network is really reliable and we could download and receive file within seconds" adds Jogi.

How to Boost up Your Social Networking!

1. It's all about networking!

People sometimes notice that you're someone if you know a lot of people. You can do this by joining the social network that we know nowadays like friendster, facebook or myspace. You can simply re-connect with your long lost friends or meet new friends to share your interest.

2. Look and sounds sophisticated

People like to talk with smart and sophisticated people but you can't do this without a broad knowledge. First step is to get in touch with current issues and always be update. You can check local site like www.detik.com, or www.okezone.com, or you can read international issues on www.time.com.

3. Be part of a community

Basically people have various interests and like to share their experiences. Develop your interest by signing up to a mailing list with the same interest as you are. For example if you're a

travel and culinary enthusiast you could sign up to jalansutra.or.id and you will get the latest info about travel places or new restaurant.

4. If you have it, flaunt it!

You know how everybody is into youtube nowadays? Well, you should! Be creative and make a funny or unique video with your friends or co-worker and post it on youtube. People all around the world will notice and see your exciting moments with your friends.

5. **Make sure you use a reliable internet connection** to help you browse and surf the net. Nowadays, speed is everything. So, it's time to use max3 internet, the fastest Broadband Internet connection in Indonesia, with speed up to 15 Mbps!

max³ for your maximum lifestyle

Bunny Diredja joined Biznet Networks in September 2006 not long after he was graduated from Bina Nusantara in the same year. Bunny had always been interested in Information Technology and followed his passion by working as Biznet Customer Care. He was transferred in April 2007 as the Technical Support with various responsibilities mainly to handle customer's problems.

Driven by his passion and broad knowledge in IT, Bunny had shown a great capability especially in customer relations. As a result of his great effort, Bunny was promoted as the Customer Care Supervisor in October 2008. In his new role, Bunny is responsible for the customer care team operational activity, infrastructure handling and also to provide technical support for end user. Bunny has to ensure his team can provide a good solution for every customer problems.

Bunny likes to go see movies with his friends in his free time. His favorite actor and movie director is Tom Hanks and Steven Spielberg, so he always watches their films. Bunny always read the movie review online for reference before he sees a film. One of his favorite sports is futsal and he enjoys playing it with his friends. Bunny also spends his weekend with his family. He usually goes to mall and enjoys a lunch or dinner with his family.

After working at Biznet for 3 years now, Bunny has high hopes that Biznet will become the leading Network Service Provider and the best Telecommunication Company in Indonesia with credible human resources, great quality and with the most advance technology.

Internet Information Safety

G

iving out your personal information to sites on the net is a touchy subject. My suggestion would be to only give out info to sites that you trust. If you don't

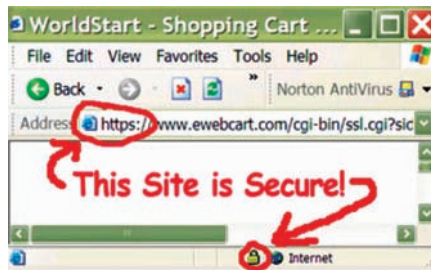

trust a particular site, don't give out your info. I'm not too worried about giving out my info to most business sites, but I'm not going to give it to someone who just would like to have it in order to see where their visitors are coming from.

Note that most good, reputable sites will have some sort of privacy policy that tells you exactly how the information you give them will be used. If you're at all unsure, it may be worth reading the privacy policy for the site in question. If you can't find one, any paranoia you have regarding that site is probably justified.

Most sites that ask for your personal information are doing so because you're signing up for something or making some type of purchase. After all, how can you buy something online if you won't give out your address and credit card info? When this is the case, I carefully look through the site to make sure it looks OK (I check for stuff like contact info, addresses, etc.) before I give out any of my information.

If a site is asking for a credit card number, they will only get it if I'm actually making a purchase. If it's for any other reason, forget it. If they are trying to get my social security number, they don't have a chance unless I see good reason for them to have it (applying for a loan, joining an affiliate program, etc.)

Oh, one more thing since we mentioned credit cards. I get a lot of people who are worried about sending their credit card info to a company via the internet. As long as the site is secure (you should see a little "lock" in the Status Bar of your browser - lower left hand corner), you should be safe.

Of course, you have to trust the company you're dealing with. If you give your card to a site that's shady (porn, illegal items, etc), then you shouldn't be too surprised if you run into problems.

On the other hand, if you're dealing with a good, legit site, then you shouldn't have any problems. However, remember, not all companies are the same - before you give any site your credit card info, be sure they have stuff like contact information, a privacy policy, and you may want to check their return policy, too (assuming it applies). It doesn't hurt to do a little homework.

For the most part, it seems like credit card theft on the internet is more likely the result of having a dishonest employee (and that's not just an internet problem), than the transmission getting intercepted. It just kills me when I see people who won't use their card online, but they don't hesitate to pass it to any scummy looking store clerk, never giving it a second thought. In my opinion, you're usually as safe, if not more so, online.

I guess the best advice is to be careful. If you don't have a good reason to give out your info, then don't. If you don't feel comfortable with a site or don't completely understand why they need your info, and then don't give it out. A good resource for more information is the Identity Theft Protector software.
