

PRESS RELEASE

As Part of Company's Support to the Recovery of Bali Tourism, Biznet Welcomes the Government's Work From Bali Program

Jakarta, Indonesia, 3 June 2021 – As part of the company's support to make Bali as a world-class remote working destination, Biznet strengthens its commitment to support the recovery of Bali's tourism industry. Recently, Biznet has also shown this commitment by welcoming and supporting the government's initiative in running **Work From Bali (WFB)** program, which is a recovery program for tourism sector in Bali that was launched last May.

The WFB program was officially launched by Kemenko Marves (Coordinating Ministry for Maritime & Investment Affairs) as a program specifically created as one of the solutions to recover the tourism sector and industry in Bali, which was hit by the on-going COVID-19 Pandemic. Through this program, various agencies, both government and private agencies are expected to allocate their budget to grow the tourism sector through business activities, including by arranging work activities in Bali or by holding corporate events in various tourist areas in Bali.

Kubu Beach - AYANA Resort and Spa Bali

As we all know, for several months, since the beginning of COVID-19 pandemic, Bali has become one of the tourist destinations with major impacts of the situation, and the impacts hit business players in Bali, and hit those who work in the hospitality and tourism industry in general. Various travel restrictions applied in many countries have become the main factor for the significant decrease in number of tourists in Bali. Looking at the situation where most people are advised to carry out working activities online, since last year, Biznet has been showing the best support for Bali in becoming a world-class remote working destination, not only offers convenient and inspiring location and working vibe, but also offers world-class technology infrastructure with a fast and stable Internet connection, to support online working activities.

"The tourism sector in Bali has been experiencing a massive loss since the beginning of pandemic, and many resorts and hotels have been affected in terms of their operational activities and also their workers. Just imagine how many workers have lost their jobs because of this situation. Work From Bali program can shed some light in building recovering the tourism sector in Bali. Apart from being chosen because Bali has an even and adequate Internet infrastructure, Biznet is welcoming this program with full support, one of which is by expanding our network in Bali area, where currently Biznet already has opened 15 branch offices in Bali and 5 new branch offices that is still on progress. Moreover, we will also collaborate with more hotels so the guests can work online conveniently with the support of a fast and stable Internet connection," said Adi Kusma, President Director Biznet.

Biznet is showing the commitment to support the WFB program by rolling out network expansion in all areas in Bali to provide customers with the best Internet service that will support online working activities. In August 2020, Biznet has also launched its new Head Office in Bali, located in Karang Mas Estate Area in Jimbaran, or known as AYANA complex. Several Biznet branch offices are also being launched and developed to give the customers easy access in using Biznet services, which will also answer customers' high demand for a fast and stable Internet connection in this digital era. Currently Biznet has been operating 15 branch offices and 5 additional branch offices on progress.
