

PRESS RELEASE

Biznet GIO Nusantara Introduces GIO Box Enterprise

Jakarta, 20 September 2016 – After officially announced GIO Box and a line of new Cloud services in May 2016, PT. Biznet Gio Nusantara (Biznet GIO), a joint venture between Biznet and Internet Initiative Japan Inc. (IIJ), is now announcing the new GIO Box Enterprise, a file sharing Cloud service for online collaboration and storage for commercial use that provides an optimal secure environment to store, sync and share sensitive and important files.

GIO Box Enterprise was created to become the solution for many organizations to store and manage their data, with user-friendly interface, maximum data security, and also various data management features. As the perfect solution for organizations that require the best online storage to store their sensitive and important data, GIO Box Enterprise offers features that provide organizations with reliable and secure data storage service, than include:

- **High Reliability**
GIO Box Enterprise is built on GIO Cloud, which provides reliability with top-of-the-line hardware, software, and system redundancy.
- **Faster Connections**
GIO Box Enterprise infrastructure is hosted in Indonesia, so connections will be much faster and stable compared to overseas services.
- **Highly Secure Network**
Security is our top priority. GIO Box Enterprise encrypts users' files in transit with secured https connections
- **Integrated with Existing IT Infrastructure**
GIO Box Enterprise's open architecture is extensible via a simple but powerful API for applications and plugins. It supports custom integrations, allowing users to integrate it with their existing workflows and tools.
- **Simple, Yet Complete Control**
With GIO Box Enterprise, users can access their data through a web interface, sync clients or WebDAV while providing a platform to view, sync and share across devices easily.

Designed to provide the best IT support for enterprise, GIO Box Enterprise offers various advantages to ensure sensitive and important data are managed securely. GIO Box Enterprise also offers features that include dedicated service, desktop application, mobile application, secured connection, and file encryption. Moreover, GIO Box Enterprise offers collaboration feature that includes group-sharing feature, comment to files, as well as activity and notification feature. Plus, it also offers virus scan, related to active directory and administration page.

"GIO Box Enterprise offers many advantages for organizations in terms of data storage and management system. We understand that nowadays, more organizations require data storage and management system to ensure that their data are secured with easy access and friendly interface. GIO Box Enterprise is hoped to be the best solution for organizations' data storage and management system, and just like other services that we offer to the market, GIO Box Enterprise is available at affordable price, so organizations can still focus on their operations without having to worry about IT expenses for data management system", said Andre Jenie, VP Sales Biznet GIO Cloud.

In terms of operation system, GIO Box Enterprise offers Android and iOS mobile clients as well as Windows, Mac and Linux desktop sync clients. The Mobile client can automatically upload pictures and videos you take and synchronize with selected files and folders. GIO Box Enterprise also features Calendar and Contacts apps to store, sync and share. Users can effortlessly share calendar with other GIO Box Enterprise users or groups on your GIO Box Enterprise server. Store contacts in GIO Box Enterprise and share them among other devices so users will always have access to the contact information of friends, family, and colleagues.

The Activity feed and Notifications keeps users updated on what is happening with their data. GIO Box Enterprise features an activity feed. See who shared a file or when it was created, changed or deleted files, commented or added a tag. Access the feed via RSS, the web interface, or Desktop or Mobile clients. Notifications pop up in the web interface and on the clients when new files are shared or a calendar invite came in. Moreover, users can also enjoy Versioning and Undelete feature, so that previous files that users have modified are retained and can be brought back. Deleted files can be recovered from the trash folder.

Here are other features offered by GIO Box Enterprise:

- Fine-grained control over access to data and sharing capabilities by user and by group
- Sharing REST API, control sharing from mobile apps and desktop clients
- Advanced quota management with configurable accounting of external storage
- Easy development of 3rd party apps with the share REST API. Quick access to core functions for apps development with the powerful GioBox Enterprise App API and webbooks, following the publication / subscription model
- Custom domain name and SSL certificate
- No limitations and users can inspect, integrate, extend and modify GIO Box Enterprise however they want
- Anti virus auto scan when users upload files
- Easy user interface with search, favorites, tags and other ways to quickly find
- File editing and preview support for PDF, images, text files, Open Document, Word files and more
- LDAP / Active Directory Integration
- Powerful integrated logging
