Digital Convergence, the Merger of Industries!

As time goes by, there is always a new innovation in the technology industry. Since 2004, Digital Convergence has become a part of our life and so far, it has brought great values into business, communication and entertainment area. The technology improvement of Digital Convergence makes multiple industries such as communication, consumer electronics and media, converging into a single industry which has made our life tend to be easier and simpler.

We found Digital Convergence as an interesting topic because it has created a new business model and larger demand of Internet services over years. In this second Inspire edition of 2010, we are happy to feature the ongoing development technology of Digital Convergence and of course equipped with lots of interesting articles to complete your necessity of technology and lifestyle information.

We have confidence that fiber optic technology we offer will always meet the increasing-bandwidth demand on digital people. We are proud to inform that currently our network infrastructure has reached around 300 buildings and more than 50 areas in Jakarta, Bandung, Surabaya and Bali. This development will be consistently continued supported with our great network and infrastructure team. In the other hand, we're preparing a new service based on Cloud Computing that planned to be released within this year. Moreover, we will keep looking for new innovations and breakthrough in 2010 to keep pace with the fast-growing of digital era.

Hope you enjoy this issue!

THE FIBER NETWORK IS HERE

Since year 2005, Biznet has been building the fastest and the most reliable Data Communication and Internet Backbone Network using Fiber Optic technology. Today, with more than 1,200 KM of Fiber Optic Route, Biznet Metro Network is available in 7 cities, 42 district, 300 buildings and Biznet InterCity Network is available from Serang - Jakarta - Karawang - Bandung.

Why wait? The Fiber Network is Here. Biznet has been widely used by leading enterprises, small medium businesses, learning centers, government institutions and homes/apartments. Use Biznet for your most critical network and applications. For more information about our services, please contact via phone +62-21-57998888, email sales@biznetnetworks.com or web at www.biznetnetworks.com.

Digital Convergence

the Merger of Industries

Since the past 10 years, Digital Convergence has become a part of our life and so far, it has extended our abilities and shrinks space. The Digital Convergence has brought separate industries such as media, consumer electronics and communication converging into a single industry. The technology improvement of Digital Convergence makes almost any type of data or files can be digitized, and it can be presented on a computer or device and transmitted over a network. Now, Faxes could be sent and received via the computer; radio could be heard via the Internet; wireless phones could be used to receive text data and browse the internet.

The combination of all of the features and abilities from multiple electronic systems into a simplified, converged and computer-mediated communication system enable us to interact, play, communicate, and share information in many new and different ways. In this convergent world, we can enjoy attractive products and solutions with new features. By this, every business in industry are challenged to follow the technology trend by adapting their product or service to the current technology.

Convergence Drives New Business Ideas

The developing world of Digital Convergence has challenged current business to be more competitive. Smart industries have to adjust their business to take advantage of digital convergence. The main current examples of converged services concern Voice and Television over the Internet Protocol. In many countries, service providers already offer triple-play services which consist of voice, internet and video services. VoIP is one of our services as well, yet we're even developing IPTV service to strengthen our products as a Triple Play service to support lifestyle of modern and dynamic people.

Moreover, Digital Convergence has led many industries into a fresh change to keep pace with the development of digital era. In media industries, such as TV and Radio, currently has offer online streaming which enable their program to be easily listened or watched through the internet and can be accessed

through computer or any electronic devices.

There are more changes and innovations in the world of Digital Convergence and since product and service offers can be represented in digital form, every company in different industries can easily and cheaply offers products and services to the entire world. Electronic publishing, virtual book store and internet banking are other examples of various products and services that can be offered on the Internet. There is more type of service and product exists today and it will continuously grow along with the high development of the internet.

Internet, the Key Role in Digital Convergence

We believe that the demand on Internet and networks is constantly growing along with the improvement of Digital Convergence. The need of broadband connectivity and super-fast internet to access the digital content is, as ever a continuing challenge for every provider, especially for us. As we provide the best service using the latest technology in the industry, we believe we could add more value to our customer's experience. Since 2005, Biznet have developed fiber optic network to serve Large Enterprise, Small Medium Business, Home Business or even family to provide a reliable and faster network connection. We believe that only people and business who are ready to make changes and adapt to new things be able to survive and compete.

Yogyakarta, The City of Cultural and Heritage

Yogyakarta, the most fascinating historical and cultural destination in Indonesia located in the center of Java Island. It is a perfect place where you can savor the fusion of scenic wonder and cultural heritage. An abundance of magnificent buildings, wonderful temples and glorious old streets always draw amazement to every people who visit this city. It is one of the most famous tourist destinations in Indonesia and a preferred location for traditional and antique lovers.

<http://sirijengsusanti.wordpress.com>

The Special Region of Yogyakarta, usually called Jogja, is the smallest province of Indonesia. Although being the smallest province, Jogja is the only province in Indonesia which still formally governed by a pre-colonial Sultanate, the Sultanate of Ngayogyakarta Hadiningrat. Jogja known for its enchanting historical and cultural heritage and it is clearly evident on its street names and building architecture. The traditional impression it selves clearly described by the hospitable local people, local transportation with

various cultural activities that surely will offer you a unique traveling experience. You will find various tourist attractions as well such as traditional markets, historical places and great performing arts like Ramayana Ballet or Wayang Kulit.

A visit to this famous city can be a cultural experience; one of the reasons is because of its famous unique place called 'Kraton Yogyakarta'. Kraton Yogyakarta or Keraton Ngayogyakarta Hadiningrat is currently as the palace

of Sri Sultan Hamengku Buwono X, the Sultan of Yogyakarta and also the governor of Yogyakarta province. The palace was built by Sultan Hamengku Buwono I in 1755. It consists of seven complexes where you can find many interesting artifacts from the 17th century of kingdom. The palace court with its glorious and elegant Javanese architecture lies in the center of the city. This building also became the centre of Jogja's governance and as a hallmark of Yogyakarta city for centuries.

wanderinglotus.wordpress.com

For you who love past inheritance, you can visit both Hindu and Buddhist temples that can be found in several locations in Yogyakarta. There are three famous temples such as Mendut, Kalasan and the Prambanan. The Prambanan temple is the one that famous with the tale of legendary Ramayana. You can watch the Prambanan's relief stone bathed in sunset's golden glow in the afternoon. If you are lucky to visit this temple in full moon, you will be able to watch Ramayana Ballet, a traditional Javanese dance by local people at the open stage near temple. The beautiful architecture made Prambanan as the most magnificent temple on Central Java and became a masterpiece of Hindu culture from the ninth century. A great building architecture stand up to 47 meters with a glorious panorama and outstanding natural beauty certainly made Prambanan as a must visited place in Yogyakarta.

Tourist vacations are feels incomplete without the fulfillment of shopping pleasure and Yogyakarta has every place to satisfy your shopping spree. The center of shopping market in Yogyakarta is Malioboro Street. The streets are lined with beautiful historical buildings with two kilometers length and became a centers of hundreds store and street-stalls which offer you various

kind of Javanese handicrafts and any other exclusive souvenir. Batik, rattan ornament, leather puppet, bamboo handicrafts, blangkon (Javanese traditional cap) and silver goods are common little things that you may find in this place. You can walk along the arcade of Malioboro Street and enjoy the scene of traditional trading activity while hunting for Jogja's souvenir for your own. Another unique thing about this market is the bargain price where you can have best quality of local product with a third

or even half price offered depends on your bargaining ability.

The greatest part in visiting Yogyakarta, you can find yourself exploring classic traditional markets while enjoying unique taste of its genuine culinary as well. One of the most popular and also one of Indonesian genuine food from Yogya is Gudeg. Gudeg is a vegetable dishes made from jackfruit served with boiled egg, tofu and rice. The dominant flavor of gudeg is a sweet taste that obtained by Javanese sugar. The sweet taste of gudeg absolutely will complete your memorable trip to the cultural city in Yogyakarta. There in Jogja, you can easily find Gudeg in every center of crowd or even in the corner of pathway, this is why Jogja often called a 'Gudeg City'.

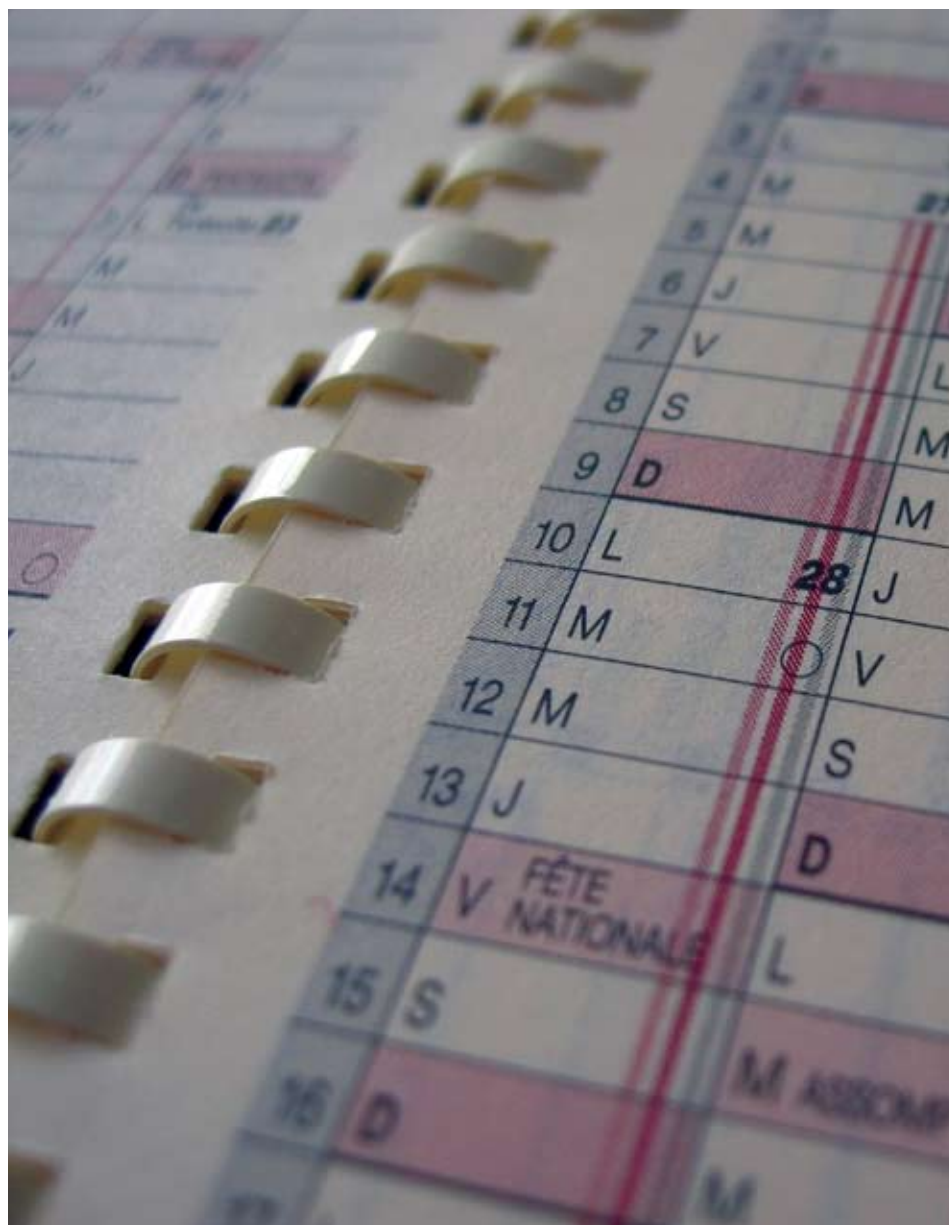

The most important thing, if you are planning your trip to Yogyakarta, then it's best to have some information about its climatic conditions. Since Yogyakarta has a tropical climate, the temperature throughout the year is no more less than 26 degrees Celsius. The dry season starts from April till September and the wet season from October till March. The best time to be there is from May to August, when the sun shines bright and the uninvited drizzle keeps the climate cool.

How to Manage Your Time in Business

How often do you find yourself running out of time? Is it weekly, daily or hourly? Usually it seems that there's just never enough time in the day to get everything done.

So this is why you have to try to get serious about time management. In business, Time is Money. When you know how to manage your time, you will gain control rather than busily working here, there, and everywhere without getting much done anywhere. Effective time management helps you to choose what to work on and when. Here, we have made few points to lead you into effective time management.

1. Planning

First, always start your day by planning. Planning will give you the energy to succeed in every task each day. Generally, it should only take you a maximum of 30 minutes to plan your day. If you have much time, you can even plan your event according to daily, weekly and monthly due date. Start to make reminder of your plan and appointment both on your computer and your mobile device. Maximize the use of you email client for planning scheduling and meeting or task reminder, on the other hand, your smartphone would also be your handy assistant so why don't you maximize the purpose.

2. Important is Important

After planning process, you will see what task should be done first and successful business people always jump on the most important thing first. Pick the most critical thing that need to be done and focus your

energy on them. If you have a time to do other thing, then you will want to do it, but if you don't, just simply halt them until tomorrow. Let's say you have two different meeting at the same time, and both are important. The next question would be "Do you have a good backup resources or a network of friends who can provide assistance?" So if you do, then it will much relieve.

3. Take a Break, Refresh your Mind

Take regular breaks. Many people forget to take breaks when they are working and do not realize they are becoming mentally and physically fatigued. Taking an hour break will increase your overall productivity even though it may feel like you are losing time at first. You can start googling, shopping online or reading some funny jokes on the Internet. This two sites, www.jokesgalore.com and www.coolfunnyjokes.com may be a cool references to start. Another different choice, listen to jazz music on your mp3 and try to perform

seated stretches to refresh your body, it would much healing.

4. Managing Interruptions

Interruption is a natural and necessary part of life, but don't let it ruined your business process. This is why you need to cut away as many distractions as possible. We all suffer from time poverty so you need to learn to take advantage of the time that you do have by limiting distractions to a minimum. You can simply just say no to your friend's invitation if it doesn't fit your schedule or even cutting your schedule over an urgent meeting. But the most important thing is when you are in the middle of your work, whether you are checking work email or making your business presentation, close the entire unimportant window on your Internet browser to keep you focus.

At last, think again about your current Internet connection. If the speed and reliability can't afford you into time

efficiency, you can lose so much time on your business process. Furthermore, slow Internet response time can cause you stress and anxiety.

So why don't you choose Biznet?

The fastest Internet service using Fiber Optic technology starts at Rp 250,000/month for max3 services, Rp. 1,000,000/month for MetroNET services or if you need the mission critical Internet, use our Dedicated Line services. For further inquiries please call +62-21-57998888, email sales@biznetnetworks.com or visit www.biznetnetworks.com.

Flashy Sushi

Imagine the taste of your favourite sushi... The combination of vinegared rice mixed with a various choice of filling and wrap with Japanese dry sea weed absolutely will tempt your culinary appetite.

You can dipped your sushi choice into Japanese soy sauce called "shoyu" to get a classic tastes, or for a modern and different touch, mayonnaise is ready to be your new choice. If you wish for something dare, by adding wasabi in your sushi will bring you a new extraordinary sensations.

Everything depends on your very own taste. We have looked around and found the right place for you to release your sushi craving. You can easily choose whether you want a budget conscious meal or be extravagant with your taste.

4 Feb – 11 March 2010

Biznet Talkshow on Radio

Biznet has successfully host a radio talkshow series from 4 February to 11 March 2010 with various

interesting topics and guests. The talkshow was held every Thursday at 9 am at Trijaya Radio 104,6 FM. The topic of the talkshow itself focused on the application of Fiber Optic technology in different industries in Indonesia. Every week, Biznet brought one of their clients from different business fields to share their business experience in using Internet technology, such as Kaskus, Qnet, Monex, Skyeight, London School of Public Relations and Samudera Indonesia Group. Listeners were

also allowed to participate during the talkshow by SMS and also had a chance to win unique merchandise as the best listener every week.

With this talkshow, Biznet would like to educate business people about the importance of Internet technology, which can transform Small Medium Business (SMB) and Enterprise company becoming a global company. They also shared the benefit of using Fiber Optic technology compared with other technologies.

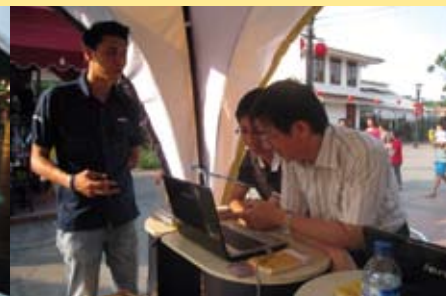

20-21 February 2010

max3 Roadshow at Flavor Bliss, Alam Sutera

Biznet brought max3 annual roadshow in Flavor Bliss area, Alam Sutera in 20-21 February 2010. The roadshow was held on weekend in order to facilitate families around to attend the event during their family time. There were special offers and opportunity to experience the high speed of max3 Internet assisted by max3ers in providing information and consultation about max3 service. Biznet presents max3 as the perfect

Internet service for families in Alam Sutera. Since launched in 28 November 2009, max3 has a well response from neighborhood around. max3 is targeted to the dynamic and up-to-date family which available with speed up to 20Mbps that is fast

enough for Googling and even for accessing Youtube at home. max3 Internet available in a wide array of pricing option which set up to meet every household budget starting from Rp. 250,000,-.

17-19 March 2010

Biznet Participated in Carriers World Asia 2010

Biznet as one of the leading telecom operator in Indonesia participated in the 12th Annual Carriers World Asia 2010, held from 17-19 March 2010 at the Harbour Grand Hotel, Hong Kong. Adi Kusma as the President Director of Biznet Networks became one of the guest speakers over thousands representatives of telecommunication companies from around the region and worldwide. Adi Kusma appeared in one of the panel discussion with topic, "Tapping into New and Current Developments in South East Asia" which discussed the current development and the future trends of telecommunication industry in South East Asia.

Carriers World Asia itself is an established and recognized senior level executive conference, where leading carriers, service providers, technology vendors and solution providers gather every year to discuss Asia's key market trends, assess growth opportunities in Asia and become one of the most informative industrial event. The aim of this event is to improve global connectivity and domestic Internet speeds through cutting edge content and impressive panel from various industry leaders.

Customer Loyalty

“Through the Customer Loyalty program, we manage to bring a positive impact to the relationship between Biznet and customer. We have planned to distribute Biznet Member Card to all of our customers this year. This card will facilitate our customers to get a lot of advantages from our services such as rewarding program, discounts and promotions from our merchant partners. Furthermore, we will consistently develop more programs to improve our service. By this, we hope our customer will enjoy the superiority in becoming one of our customers.”

Anton Sudjarwo
Customer Loyalty Manager

In many business situations, the customer will have more interactions after the sales process and this is where the customer's experience begins. Biznet itself believes that customer has every right to be served the best. Aside from creating innovations in technology sector, Biznet gives a special attention

into customer's need. Customer Loyalty program plays the important roles in Biznet and customer relationship. In order to bring satisfaction in every customer, Biznet through their Customer Loyalty provides an excellent-customer oriented service to support their high quality of product.

SPORTS & ENTERTAINMENT PROGRAM

General activities of customer loyalty program that every company commonly does are making a phone call, contact by email, meeting, sending a greetings card and others. The purposes of this activity are to maintain a good communication with customers and get feedback as a part of evaluation process to improve the service. In Biznet, aside from above communication activities, their Customer Loyalty also brings entertainment, networking and fun program. The goal is to build a good relationship with customer by interacting, having fun and raising a competitive soul together in one harmony.

Biznet maintains several sport programs which were held routinely in a year. Biznet manages to combine a fun and fair atmosphere in every game. By this program Biznet hopes customers would have a great experience where they able to build a relationship by networking while enjoying the games. Biznet at this time, has running two types of sport competition such as Golf Tournament and Futsal Competition. But in order to add more variant to this program, Biznet considers in holding another type of sport event such as bowling, billiard and tennis.

In the other hand, through various entertainment events, Biznet makes a serious effort to embrace customers as a part of Biznet family. Biznet Year End Party is a part of the program which hopes would provide Biznet's customer an annual entertainment event. Biznet Year End Party holds annually and always comes up with different and unique theme each year.

In the future, Biznet will consistently bring another interesting Customer Loyalty events and program. Of course, sport and entertainment will always be the part of it. If you have any idea or suggestion for the next program, you can email to marketing@biznetnetworks.com. We welcome any creative idea and suggestion.

Social Networking Overload

Between Friendster, Facebook, Twitter, MySpace, Foursquare and now Google Buzz, there are just too many social networks to keep track of. Sure, you could pick one and stick with it, but then you might only be paying attention to some friends while neglecting others. It's the worst kind of information overload.

The Tips: Use a program that aggregates several social networks into one interface, such as Digsby or Meebo. You might not get the full functionality of your favorite network, but at least you can keep an eye on status updates with minimal effort.

This Search Bar is Worthless

As a whole, Web sites' internal search engines are so bad that we rarely trust them anymore. They'll fail to dig up that article you read a few months ago, or they'll bury it among countless irrelevant results, and they lack the tools of a real search engine.

To fix this, head to your search engine of choice and precede your search with

site: **name of site.com** "what you're looking for" for a surprisingly good index of what you seek. Google can even display results by date when you click "Show options."

How Apple Got Its Name?

In 1976 Steve Jobs, the founder was working in a community type farm in Oregon and that inspired him to name the company Apple Computers. He and Steve Wozniak, his co founder both still tried other alternate names such as Executex and Matrix Electronics. It turned out that they didn't like it as much as Apple. Later the company was changed to Apple and dropped the Computers part, after they successfully diversified into iPods and iPhones.

Choose **max³** Internet, the Most Cutting Edge Product for Your Family Lifestyle!

If you are looking for a high speed of residential Internet access, price might be your first consideration. Though there are many broadband service providers in the market claim they has the lowest price with best quality, think again, are the speed and technology enough for your family needs. You really have to be smart by spending your money for the best one that could bring more values on your family experience. Take a look at **max3 Internet**! We have break down into several points which might interest you and your family as well.

Why max3 Internet?

max3 Internet uses an advanced technology with Fiber Optic cable to keep pace with the new, fast, and ever-changing world of Internet needs. The commonly needs to get easy, quick and uninterrupted access to the Internet is now become a reality with **max3 service**

and it delivered right at your door via Fiber Optic technology.

The Fastest Internet Service for Home User

Compared to the other Internet services, **max3 Internet** with speed up to 20 Mbps still become the fastest Broadband Internet service for home user available in the market today. With a High Speed Internet connection, your kids would easily do their online activities like watch videos, download heavy files and songs, play online games, voice chat, web-cam, and other things they usually do while spending their time at home.

Various Packages for your Household Budget

With **max3 Internet**, you don't need to worry about the price. **max3 Internet** is available with a wide range package to

match your household budget starting from Rp.250.000 to Rp.3.500.000. Not only that, if you want to experience the unlimited Internet service, try **max3 xpress**, with speed up to 768 Kbps you are free to download and upload more data without afraid getting out of quota.

Share max3 Internet with your family members

max3 Internet can be easily shared using Broadband Router, so every family member at your home could connect to the Internet. It's affordable and makes accessing the Internet real easy for families with multiple computers. While the teens are studying through online journal, your wife can browse new recipes for her cook and in the other hand you can still read online sport news or watch video on Youtube.

Is max3 Internet already available at my home?

max3 is available in several areas in Jakarta, Bandung, Bali and Surabaya. Until now, we still consistently expand the network coverage to reach more neighborhoods. If you want to know whether your home has been on max3 coverage area, visit www.max3.co.id/en/coverage.asp or please contact our max3 store to learn more about our coverage.

Definitely, **max3 Internet** is the only product that could fulfill your family's lifestyle. By using max3 Internet you would be proud to be one of the high technology Internet users. So have you decided what's best for your family? Visit us at the nearest **max3 store** or call our Hotline number **500988** for more information.

PT. Menara Sinar Semesta

PT. Menara Sinar Semesta was established on 2005. One of the company's businesses specialized in providing messaging platform such as Hosted Mail service to various business sectors.

"Through hosted mail service, small medium enterprise, organization or even the government can easily have a premium email without having their own server. Our Hosted Mail service yet is not as popular as Microsoft product with its exchange server, but we believe our product could exceed the standard of today's business email" marked Dani Anjaya, the Director of PT. Menara Sinar Semesta. The service is using the function of Basic Linux System which compatible and can be easily connected to the Blackberry Enterprise Server Services, iPhone, Android and Motorola.

The man behind this fast growing business, Dani Anjaya, is really has a great passion in technology and gadget. The company also manages www.feedberry.com, a website which provides all about

gadget convergences, information and issues about mobile technology. Hosted Mail itself launched in August 2009 and until now, it offers two types of service such as Standard Hosted Mail and Premium Hosted Mail service using back-end system of Basic Linux.

PT. Menara Sinar Semesta realized that it is essential for their company to have a good Network Service Provider to support their business. "Once our Internet and network connection in problem, ten thousands or even more emails will suddenly stopped. And of course it would be a disaster for us especially for our clients", said Dani. Since Internet and network has been a backbone of their business, PT. Menara Sinar Semesta chooses Dedicated Line 512 Kbps CIR 1:1 with Local Loop 2 Mbps

from Biznet to support their operational activity. "We choose Biznet because it has a proven reliability and high quality of service. So far, Biznet has a prime quality of network with 99.8% uptime. With the support of Biznet, we believe we could successfully maintain our credibility as an Email Service Provider". Stated Dani followed by his last words, "Biznet is the best".

For more information about the service, pricing and availability, please contact directly to Mr. Dani Anjaya on **+62-81-23458008** or e-mail to **info@mailmss.com**

Aryondo Saragih

Network & Service Assurance Manager
aryondo_saragih@biznetnetworks.com

"I hope someday Biznet will own the longest wet/dry Fiber Optic network in Indonesia to provide the high technology service through to all Indonesia Region"

Endang Sunarya, usually called Arya is known as a funny and outgoing person among his colleagues and friends. Arya received his Bachelor of Electrical Engineering from Pancasila University in 1992. When he first joined Biznet in 2001, Arya was recruited as Data Center & Facility Manager. After 5 years working at Biznet, Arya had a chance to work in other company. Not more than two years later, Arya returned to Biznet and received his current position as a Project Manager for Biznet InterCity Network. His overall responsibility is to construct and maintain Biznet InterCity Network by connecting cities along the route. Between 2008 to 2010, Arya had

successfully completed Biznet InterCity project with total construction of 250 KM from Bandung (West Java) to (Anyer) Banten. The InterCity network covered Bojonegara, Serang, Balaraja, Cikupa, Bitung, Cikokol, Jakarta, Bekasi, Karawang, Purwakarta, Padalarang and Bandung. Arya is also responsible for one of Biznet's latest project, a technopark project called Biznet Technovillage, which located in Cimanggis, West Java. He is responsible to monitor this huge project from development to construction period.

As a family man, Arya always prefer spending his weekend time with his

"My hopes for Biznet that it can be grow even bigger in the future"

family. "I am always excited in welcoming every weekend. It's the time where I could spend the most precious moment along with my lovely family. Dining out and experiencing new culinary dishes is how we spend our weekends", he

Rio Sagita, a father of three years old girl, joined Biznet since July 2008. Rio, so his nickname, is currently working as a Creative Multimedia Manager. "Creative process is another form of communicating company's image", said Rio when being asked about his job. Rio is responsible in monitoring and leading his team to design and produce promotion material. Rio and his team always challenged to come up with new ideas to create a creative and innovative design, but through his creative mind and a great passion on this job, he found it easy in bringing them together.

Rio and his daughter really enjoy collecting fish ornaments. When

Rio Sagita

"I trust Biznet will be able to strengthen its position as a leading telecommunication provider"

weekend comes, they will be ready to spend the whole two days for this hobby. "Fish-keeping is a hobby that can bring peace, joy and beauty into your life. By looking at the colorful and unique patterns in different fish will

certainly relaxes your eyes", said Rio. Rio is very excited when it comes the time to expanding his collection of ornament fish at Fish Market, where Rio could also find variety accessories for his aquarium. Aside from collecting fish, Rio also loves to collect boy band posters. His favorite boy bands are N'sync, Boyzone and a phenomenal Band from Taiwan, F4. "All of their posters neatly plastered on my wall and it won't bother me if anyone thought they are amusing" he passionately explained.

Talking about music, Rio has a great interest in two different kind of music genre such as Reggae and Dangdut Remix. In Reggae, he found himself a

Aryondo Saragih, usually called Aryondo, a graduate of University of New York - Bernard Baruch, known as a friendly person among his friends. His current position as a Network & Service Assurance yet doesn't match his educational background as Bachelor of Economic at all. It seems that his passionate for computer and software has led him towards his present career. "I always have special interest in computer since high school", He said. After graduated from the university in 1997, he once worked as a Junior Accountant in a big company in New York, but it turned out that his former superior sensed his passion for IT and soon he was transferred into IT division. He joined

Biznet on October 2008, not long after he got back to his hometown, Jakarta. Until now, Aryondo is responsible for maintaining or increasing the uptime of Biznet's services for the customers. A portion of the IT services pertaining to security. He also provides periodical security auditing of the systems especially those that are directly related to services provided to the customers.

Aryondo usually spends most of his weekend reading books or magazines while enjoying his favorite music. Turntables are his favorite musical instruments which apparently contradict from his job which required a very serious and meticulous mind.

Surprisingly, Photography is one of his main hobbies too. During his spare time, aside from hangout with his friends and family, Aryondo prefer nothing better than to photograph his surroundings. He often visits different places to capture beautiful scenery.

Looking towards the future, Aryondo expressed his high hopes for Biznet to become the biggest Fiber Optic provider in the industry. "I hope someday Biznet will own the longest wet/dry Fiber Optic network in Indonesia to provide the high technology service through to all Indonesia Region", explained Aryondo.

explained. When being asked about his hobby, Arya simply called automotive as his main interest, especially when it comes to Peugeot car. Deeply in love with his hobby, he directly became an active member in one of automotive community, Peugeot 405 Community. "Its fun having a group of friends to share about the same hobby, we often refer to each other's ride with a funny name, like mine which usually called Maman's" said Arya.

Working at Biznet for more than 5 years, Arya still shows a great enthusiasm like his first day. With his motto 'Strong Dream, well prepared and destiny', Arya put a strong confidence for the company growth. "My hopes for Biznet that it can be grow even bigger in the future where the company's development may expand rapidly especially in network and infrastructure area. But of course this will need strong planning and good strategy together with the extraordinary spirit of young people in it", said Arya when being asked about his hope for Biznet.

very similar spirit with Bob Marley, which represents a freedom to be creative. Aside from Reggae, Rio also loves Dangdut so much, especially when it comes to Dangdut Remix. One of his favourite Dangdut singers is Joni Iskandar. You can even found Joni's long and curly hair style totally similar with Rio's.

When being asked about his future hopes for Biznet, Rio clearly explained his confidence that Biznet will be a great company in the future. "I trust Biznet will be able to strengthen its position as a leading telecommunication provider. With a support of the creative mind and a great leader I think it is really possible to be happened", said Rio.

Biznet Milestone

Biznet Networks established in 2000 as an Internet Service Provider to provide Internet solutions for business customers. In 2000, Biznet was using the Wireless and In-Building Ethernet Technology, with the support from a committed and the best engineering team, Biznet Networks started to build its way towards becoming one of the leading Network Service Provider in Indonesia.

With the emerging demand of a very reliable network infrastructure, Biznet Networks realized a lot of companies are depend on a good infrastructure to manage their business. After several research and development, Biznet Networks Engineering Labs Team considered Fiber Optic as the best network and soon started to deploy the Fiber Optic network around Jakarta.

Our path to success

2005

The first development of Fiber Optic Network in Sudirman area with ring configuration using Metro Ethernet technology. Total distance 10 KM.

2006

Biznet expanded coverage to cover more CBD area such as Thamrin, Gatot Subroto and Simatupang area. Total distance 50 KM.

Biznet set up new direct link to Japan and peer with Japan Internet Exchange (JPIX).

The origins of the Internet date back nearly 40 years, with the U.S. military's funding of a research network dubbed Arpanet in 1969. Since then, the Internet has undergone more than just a name change. The number of computers connected to the Internet has grown exponentially, while the number of users has risen from a handful of computer scientists to 1.5 billion consumers. The network's reach has expanded beyond the United States to every corner of the globe. Back then, the big development after was the World Wide Web, a part of bringing the network together by allowing many data and information easily found and organized through the Internet.

As the Internet grew through the 1980s and early 1990s, many people realized the increasing need to be able to find and organize files and information. One of the most promising user interface paradigms at that day was hypertext. The technology was developed through Ted Nelson's research on Project Xanadu

and Douglas Engelbart's research on NLS. Many small self-contained hypertext systems had been created before, such as Apple Computer's Hypercard. Gopher became the first commonly-used hypertext interface to the Internet. Another projects such as WAIS and the FTP Archive list also attempted to

create ways to organize distributed data. Unfortunately, Gopher and all these projects fell short in being able to accommodate all the existing data types and in being able to grow without breaking down.

In 1990, Tim Berners-Lee finally invented the World Wide Web as a method of publishing information in a hypertext format on the Internet. The Web began to take off in 1993, after computer science student Marc Andreessen created the first popular Web browser, known as Mosaic. Since then the number of Web sites and Web pages has exploded. The World Wide Web with its universality was a new killer application and most people until these days use it as information space to share data and information through the Internet.

2007

Biznet expanded Greater Jakarta. Total distance 250 KM.

Biznet launched Metro FTTH Network, the first Fiber To The Home network in South East Asia.

2008

Biznet deployed Biznet InterCity Network between Serang and Bandung to provide connectivity along those areas. Total distance 1000 KM.

2009

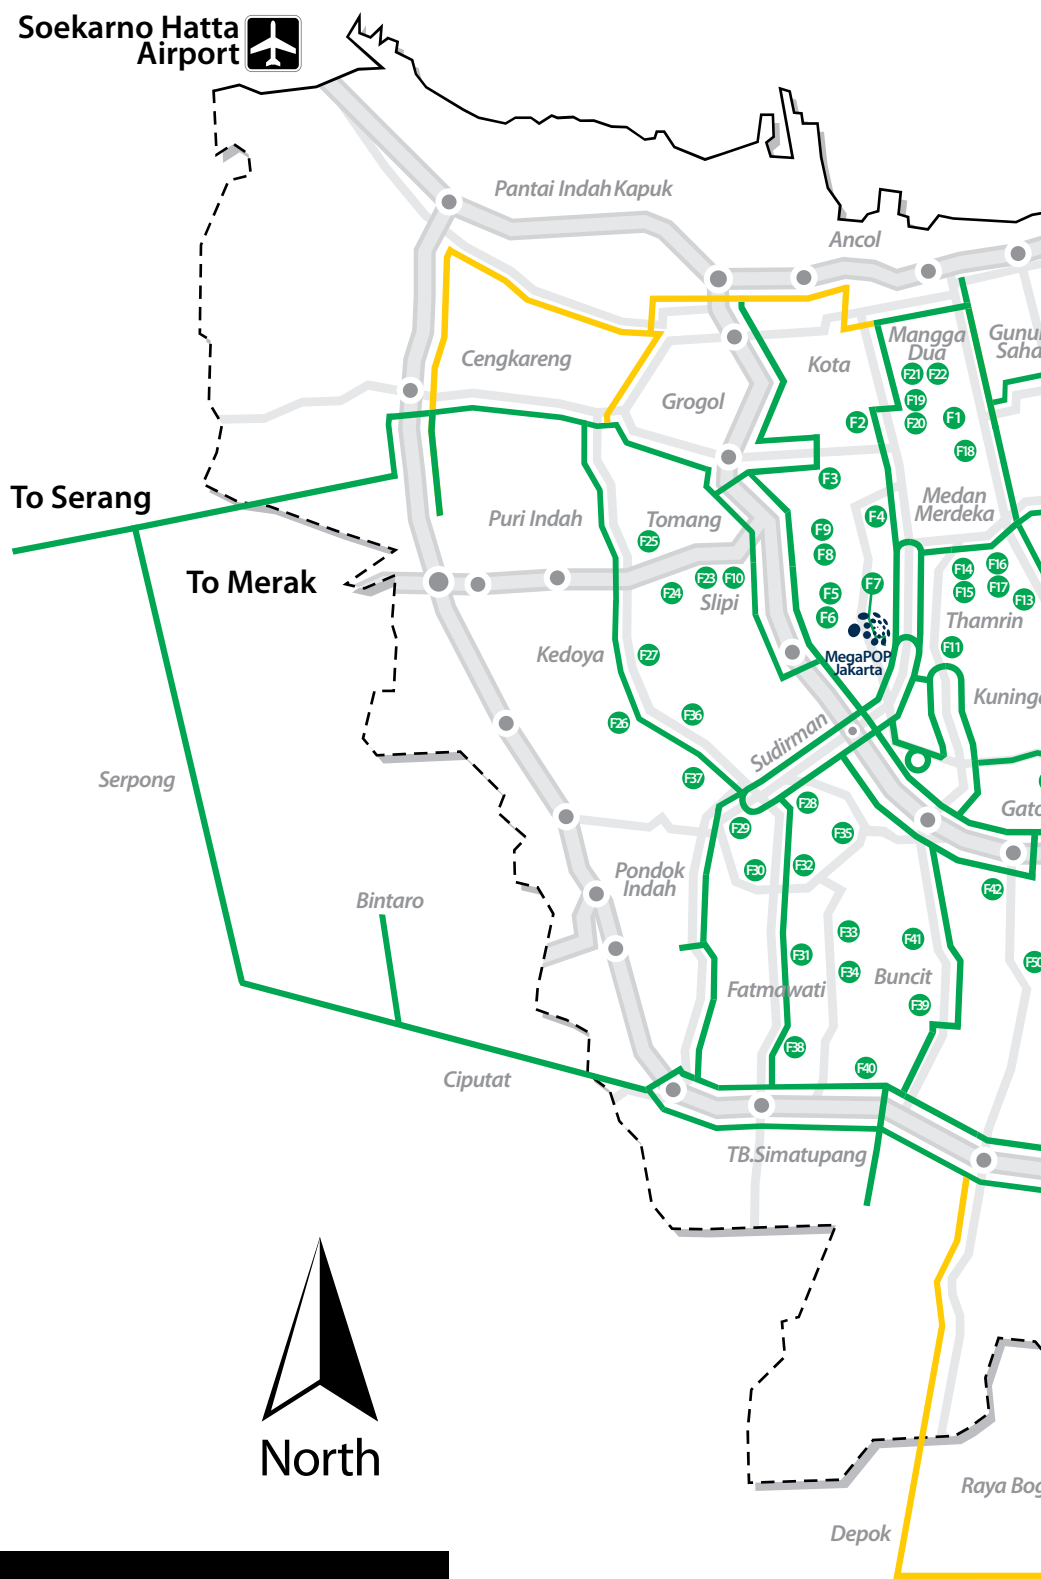

Biznet expanded Metro Fiber To The Home Network (Metro FTTH) to Bali Island with total around 30 KM of route installed. Total distance 1200 KM.

Global IP Transit

Internet has become a critical network infrastructure to support business application as well as personal communication. Both business and residential users demand the best service, network performance and pricing to accommodate their requirements. To support those requirements, Biznet Global IP Transit Service is the best choice for stable and robust solution.

As one of the leading telecom infrastructure company in Asia, Biznet offers Global IP Transit with redundant equipments, ultra high-speed connections to all the major Internet backbones and Internet Exchanges, and ensuring routing and bandwidth allocation available at all time. Biznet Global IP Transit is the best choice for you and your customers.

Biznet Global IP Transit services provide direct connection to multiple Global Tier-1 Internet Providers and leading Internet Exchanges in the world. Using our service removing the hassle to negotiate direct peering agreement with major content providers in Asia, Europe and USA.

Proven Performance

Biznet Global IP Transit provides you with a superior Internet experience. We guaranteed 99.8 percent Service Level Agreement (SLA) uptime, the lowest packet loss and latency, direct connection to major Internet Exchanges in the world using multiple submarine cables as redundancy. Many telecom carriers, ISPs and enterprises have been using this network since year 2000.

World-Class Premiere Care

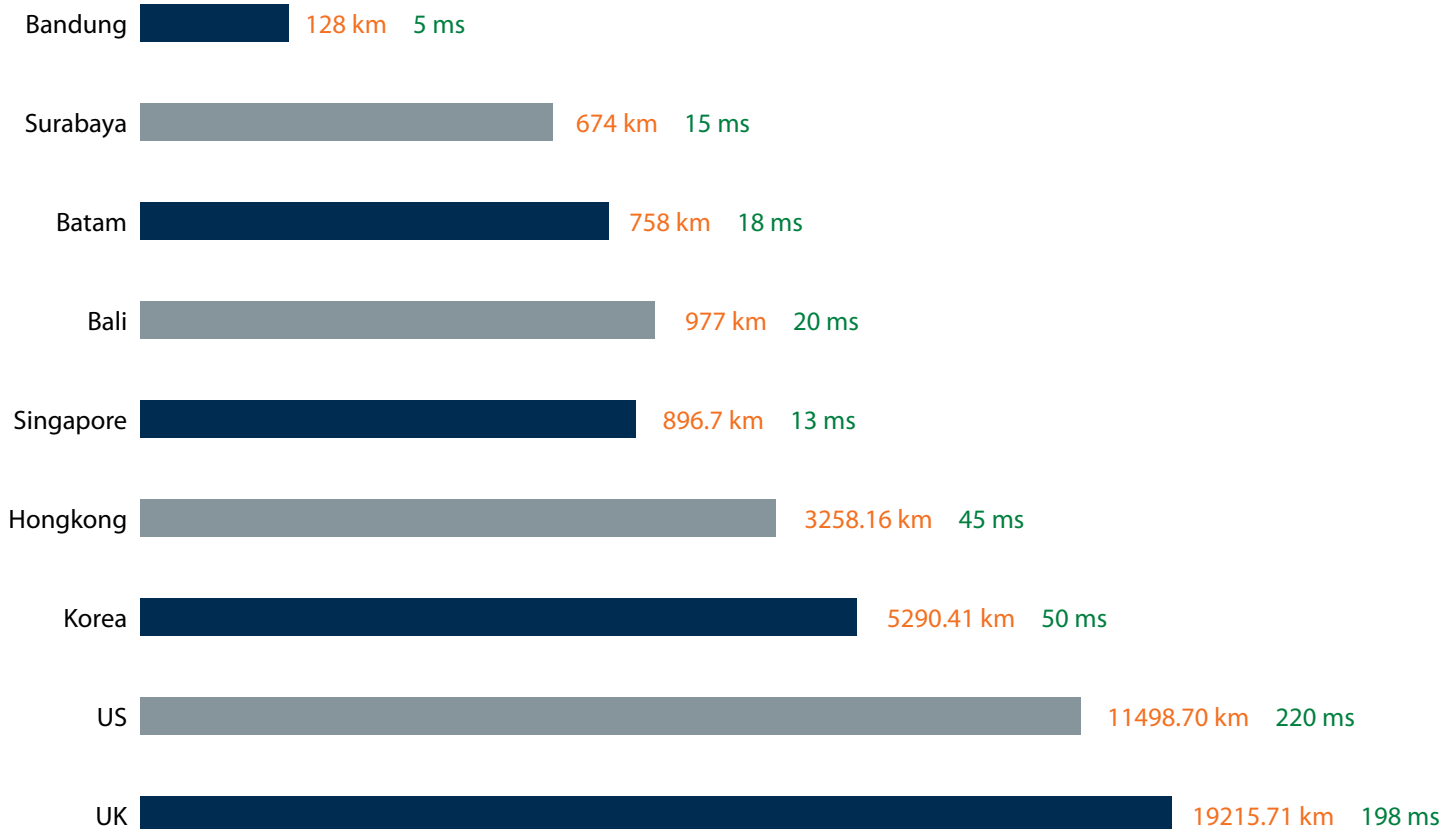

Biznet Premiere Care is the heart of our proactive support service to our customer. Network performance constantly monitored 24x7 at Biznet Global Network Operating Center facility in Jakarta, Indonesia. With multiple support level system to ensure all the issues resolved quickly and effectively to minimize downtime for you and your customer satisfaction.

Global POPs Location

Biznet GlobalPOP located in Jakarta - Indonesia, Singapore, Hong Kong - China, Tokyo - Japan, Seoul - South Korea, Palo Alto - USA and London - UK. Biznet is actively expanding our GlobalPOP coverage.

From Jakarta

Website you usually visit:

www.kompas.co.id = 0 ms **www.kaskus.us** = 0 ms **www.detik.com** = 1 ms

Distance

Ping time

Ping times above are the average of total time spent in reaching the destination from your computer through Biznet Network in normal condition.

Ping time indicated in milli-seconds (ms), 1 ms = 1/1000 second

Biznet Networks has direct connectivity (Direct Peering) to major cities and Internet Exchanges in the world to minimize the route to reach destination for shorter hops.

Facts:

- Ping stands for Packet Internet Groper which created by Mike Muss in 1983
- 'Ping' inspired from active submarine sonar which usually makes ping noise as it meet an object.
- 'Ping' has the analogy when sending a package of data; it will receive a package of data too as a reply.

Why Do You Choose Biznet As Your Provider?

One of the leading telecommunication provider in Indonesia

Using Fiber Optic, that provides the most reliable network connection

24 hours professional customer care
