Greener IT, an action towards a Sustainable Future

Lately, environmental issues became the world's focus of attention. Global warming has brought so many impacts around the world. The government and United Nations already take actions to keep us consider on what can be done to reduce global warming. We should support this actions, it can start from ourself, family or either in working environment.

Starting 1 July 2010, we're pleased to announce a new metroNET service packages, two times faster than the existing service with the same low price. Biznet metroNET service has been a top choice for many Small Medium Business (SMB) market. This service is suitable for that particular of business, where budget and quality has been a top priority. We hope with this offering, the business can grow with better Broadband Internet service.

And finally, dear readers, I would like say thank you for the continuous support and trust that you have given to us. I believe that we could succeed in overcoming something new and more innovative. Our Engineering Labs Team is always thinking what kind of service that our customers need in the coming future. Please enjoy the materials and hopefully it will inspire you in your life and business. Happy Reading!

THE FIBER NETWORK IS HERE

Since year 2005, Biznet has been building the fastest and the most reliable Data Communication and Internet Backbone Network using Fiber Optic technology. Today, with more than 1,200 KM of Fiber Optic Route, Biznet Metro Network is available in 7 cities, 42 district, 300 buildings and Biznet InterCity Network is available from Serang - Jakarta - Karawang - Bandung.

Why wait? The Fiber Network is Here. Biznet has been widely used by leading enterprises, small medium businesses, learning centers, government institutions and homes/apartments. Use Biznet for your most critical network and applications. For more information about our services, please contact via phone +62-21-57998888, email sales@biznetnetworks.com or web at www.biznetnetworks.com.

Greener IT, an Action towards a Sustainable Future

“I have always believed that IT is the engine of an efficient economy; it also can drive a greener one”

Michael Dell, Forbes magazine

As we know that climate condition and glass house effect has become a serious problem facing the world today. It becomes primary concern from the major countries in the world since the last few decades. Although not everyone believes into the theory of global warming or believes that human actions have such a significant impact on the environment and even scientists share different opinions. However, there is enough evidence to prove that the earth's resources are limited, so precautions must be taken for the future of our ecosystem. Information technology itself considered plays a certain role in the problem of climate change and global warming issues, yet on the other hand it evidently motivates enterprises to adapt Green IT.

It's no secret that data centers and computer networks account for an exceedingly high percentage of many companies' total energy consumption. A report on 2009 by Gartner, industry analysts, said the global IT industry generated as much greenhouse gas as the world's airlines - about 2% of global CO2 emissions and data centers are among the most energy-intensive facilities. By this, we can imagine how large the energy consumption of every company in this world that runs computer network and data center. Most business leaders need to

be quick in adapting Green IT such as improving power management, using energy-efficient hardware or adapting virtualization technology. The use of green IT is to save money and energy while reducing carbon footprints and preserving the environment.

Since two years ago, Biznet replaced telephone system over IP phones (VoIP) which requires less energy to operate than other compatible systems. Biznet Technovillage Project located in Cibubur, West Java, will have many green concept in terms of building design, landscape, power efficiency, lighting and data center cooling. By using solar panel for lighting, Biznet aimed to cut gas emission and save more energy. A Cloud Computing service, which will be ready in coming months, will provide shared computing facility (virtualization) in a secure environment

Our Future is Green

Now is the time for us to make practice Green IT for sustainable future. All stakeholders must understand about the economic and environmental management. Through technology and innovation, we could decrease environmental impact and be responsible for the future of our next generation.

Bunaken Island

If you are deeply in love with beautiful seas, white sandy beaches and exotic scenery, you don't have to go far to experience some. In Indonesia, there are lots of magnificent natural seas and islands which ready to indulge your sense and most of them have been recognized as the world's most beautiful places. Thousands islands decorate the archipelago and one of the most visited is the Bunaken Island.

Bunaken Island located in the bay of Manado, north Sulawesi Island, Indonesia. It was discovered by national divers ten years ago and became local tourist destination ever since. Famous for its plentiful underwater wonders and laidback island charm, the government then settled the place as one of the Marine National park on Indonesia in October 1991 named Bunaken National Park (TNB). Nowadays, it attracts both local and international tourist and

become one of most visited place in Indonesia.

To reach Bunaken Island, first of all you need to go to Manado, North Sulawesi. Manado is the capital of North Sulawesi, Indonesia. Manado can be reached by plane via Sam Ratulangi International Airport, Manado or also can be reached by sea via International Port of Bitung. The trip from Manado to Bunaken takes time for about an hour using motor

boat from Manado Harbour (takes 30 minutes to reach the harbour by car from the airport). During this trip you are guaranteed not to be bored, because the motor boats are equipped with glass opaque on the floor, so that during the trip you can see the underwater world of natural beauty. You can see a wide variety of ornamental fishes, Sword Fishes, Angel Fishes and of course you can enjoy the beautiful coral reefs and colorful sea grasses.

<http://nouvan040147.wordpress.com>

<http://syadera.files.wordpress.com>

<http://chipirhieely.wordpress.com>

<http://www.wikiwak.com>

As you arrive there, you don't need to be confused to find a place to stay. There are many friendly relaxed beach resorts in Bunaken where you can get the taste of island living experience during your stay. You can stay in tidy cottages right on the beachfront or nestled into the hillside under shady trees. Ranging from the price Rp. 250.000, until Rp. 2.000.000, you will able to enjoy nice laid back stay with sea breeze offered by them. Soon after you find suit place why don't you relax and unwind the tropical island of Bunaken beach while you enjoy a refreshing drink and soak up an amazing orange sunset, or experience the fine seafood cuisine.

With dozens of spectacular dive sites, Bunaken Island becomes one of the most popular locations for snorkeling and diving. Bunaken as a part of the Bunaken National Park, has a wide variety of natural biota, and has the highest marine biodiversity in the world. Besides the beauty of its natural biota,

other superiority of Bunaken Island is the clarity of its water, the visibility in the dry season can reach 35mm. The visitors who love adventurous sports like diving and snorkeling; Bunaken Island is considered as paradise for them.

Here are some diving tips for beginners. First of all you must be in a reasonably good shape and must be comfortable underwater. Although Scuba diving does not necessarily required good swimming technique, it is best to feel comfortable underwater just as you are above surface. Then, beginners should always enroll in a certified dive school to get a genuine experience of diving in a safe and controlled environment. Aside from the basics lesson by the qualified instructors, safety skills such as clearing your mask underwater, signaling, managing low air supply and reinserting oxygen regulators are also an important part to learn. Third, all scuba diving activities should be done with the basic, appropriate gear, and these would be your mask,

fins, Buoyancy-Control Devices (BCD) and wetsuits. Most dive shops around Bunaken Island would provide the necessary equipment, but you should consider having your own masks and snorkels to avoid if the mask u bought on the dive shop might not suited your face and disrupt your vision underwater. Next, new divers are always required to dive with guides or "buddies" who could check and help with the necessary equipment. So you better bring your friends to accompany. It is also important to choose a reputable guide for your first dive. Not only they have the best experience underwater, they would also be prudent enough in dealing with any problems that may be encountered underwater. Last, being relaxed is the most important thing when scuba diving. Be relaxed and enjoy your underwater adventure for a memorable diving experience. So let's go to Bunaken Island and be the one to experience the incredible collection of Bunaken's sea life!

How to Implement "Green" Movement in Your Office

Global warming has become perhaps the most complicated issue facing the world today's. Climate change, extreme weather conditions, ecological disruption, the increasing of global temperature, global warming have serious impacts to environment and society which we can clearly feel from now. It needs an action for you and all of us to reduce the impact of global warming.

We can do something instead of just sit and let the government or the international social institutions to take action. We can try to help saving our planet, started from ourselves through our closest environment.. So why don't we start adopting green movement in our office? Thus, becoming a green company is an opportunity to add value to both your company and your business.

- **Provide Green Education**

The more they understand, the more they interest to the green concept. Provide green education for employees by sending maintenance, quality control, engineering, supervisors and managers to types of green seminar or conference to learn more about going green. It's a good start to persuade them to support the green movement in your office.

- **Corporate Green Policy**

Through the human resources department, corporate can communicate a written policy which designed to reduce waste and help the environment. It can be an effective tool for office employees while executives can lead by example to show their support on the green policy. There are numerous measures that can be communicated through corporate policy, such as low energy utilization, water sparing, computer network policies, etc.

- **Choose Eco-Friendly Office Products & Solutions**

Reduce the amount of electricity consumption by using eco-friendly office products such as LED desk lamps that use 90 percent less power than lamps using incandescent bulbs. You can also Review the company's IT equipment closely. Many of the computer companies, IBM in particular, are offering green solutions to reduce power usage and to help trade up old equipment.

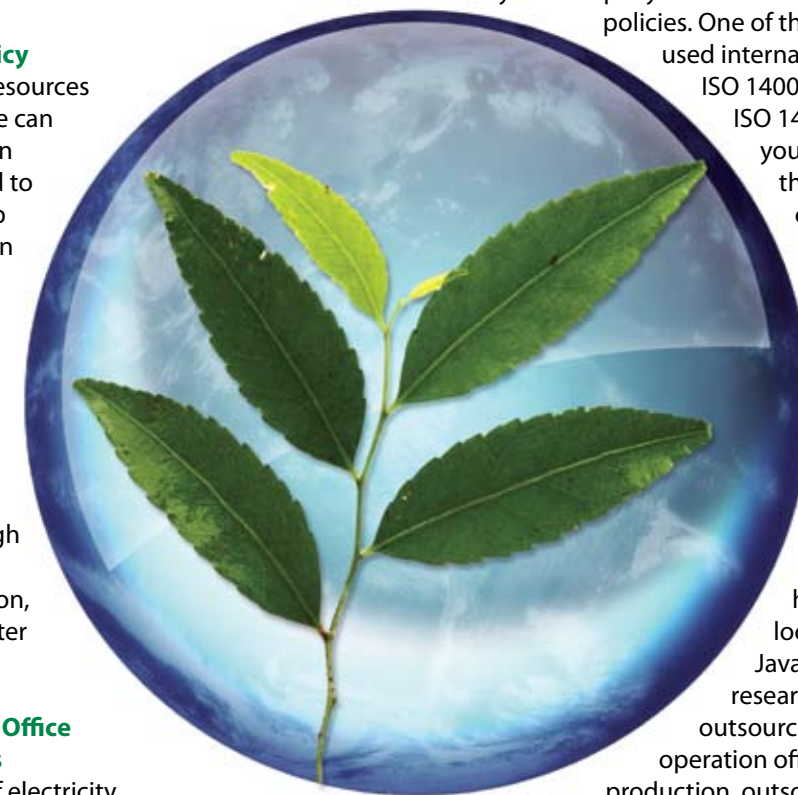

- **Organize Green Event**

You can host green events several times a year such as

ride-a-bike-to-work day, car free day, tree planting day or litter free day. It will be even better if your company make reward for the employees who showed a great contribution to support the event. The awards can be based on various categories; such as the Best Green Spirit, Best Participants, Best Volunteer, or else. You can create as many as possible to make them more fascinated to participate the event.

- **Obtain Environmental Based Certification**

Does your company really concern about the environment and has been doing those things above? Why don't you register your company at <http://www.iso14000-iso14001-environmental-management.com> to obtain an international scale certification and emphasize that your company has consistently supported environmental policies. One of the certification that has been used internationally in 138 countries is ISO 14000/ ISO 14001. By obtaining ISO 14000/ ISO 14001 certification, your organization can measure the environmental impact that caused by your company's product or activities, based on the result from the audit and analyze of accredited Certification Body.

Last, if you're looking for a green environment for your new office, check our latest project, Biznet Technovillage. Biznet Technovillage is an integrated high tech & modern village located in Cibubur area, West Java – Indonesia, targeted for research, telecom, media and outsourcing companies for their operation office, research center, media production, outsourcing center and backup facility. By using solar panel for energy and raise 30% from total landscape of Natural Park, water garden and open space will absolutely bring a new innovation to support green movement for your company. Plus it equipped with data center and direct connection to Biznet Fiber Optic Backbone to meet your telecommunication need. For more information about Biznet Technovillage or future leasing, please contact our sales via phone +62-21-57998888, email enterprise@biznetnetworks.com or visit the website at www.biznettechnovillage.com.

Exploring seafood

Everybody sure loves seafood.. Steam-Cooked Patin Fish, Prawns in Tamarind Sauce, Lobster Grill, Crab with Black Pepper Sauce, Boiled Shell, Calamari... Our mouth must be watered hearing the list of those seafood dishes. It comes in uncountable variants accompanied with medium or super hot chili sauce. Plus it is a fact that seafood is a great source of high-quality protein and low saturated fat which is good for our body. Imagine if you could enjoy fresh seafood dishes with delicious spicy-sour or salty flavor spices together with your friends and family...hmm...tempting isn't it? Well seafood lover, you don't have to go to far...lets go find out here.

Biznet Corporate Social Responsibility; Free Medical Check Up and Medication Desa Bojong Nangka, Cibubur

On May, 8th 2010, Biznet Networks and the Medical Faculty of University of Indonesia held a free medical check up and medication in Desa Bojong Nangka, Cibubur, West Java. The purpose of this program was to help and provide information and knowledge to the local communities

about the importance of a healthy living. The activity begun at 9 am, took place in Bojong Nangka District Office, served around 300 patients from 6 villages nearby Bojong Nangka area. Seven doctors and students from the Medical Faculty of University of Indonesia and Biznet employees participated on this program. Patients who attend this event not only got a medical examination, but also a free medicine to complete the medical treatment. The enthusiasm from the Bojong Nangka's citizen was very positive for this social activity. Furthermore, this program will be

continuously run by Biznet to take part in improving the welfare of Indonesian people.

March – May 2010

Biznet Goes to Campus

Biznet Goes to Campus program started since March 2010 until May 2010, with scheduled to visit several major Universities in Indonesia such as Al Azhar Indonesia University, The London School of Public Relations and Paramadina University. The program consists of a series of activities including seminar, talk show, games, door prize and Internet demo. The seminar topic was around "Understanding Fiber Optic Technology", presented speaker from

Biznet discussed about the Fiber Optic Technology and its application in telecommunication industry. On the other hand, "Just Click and All Business Is in Your Hand" became the talk show topic, presented guest speakers from

BloopEndorse.com and Mark Plus Institute of Marketing. The talkshow brought a lot of information where students can learn more about entrepreneurship, online marketing and online business. Biznet Goes to Campus has successfully gathered 586 participants who included students and lecturers from the 3 universities. Through this program, Biznet would like to share about fiber optic technology as today's most sophisticated technology, and as Biznet's concern in educational sector, Biznet would like to take part in developing education in Indonesia.

2-4 June 2010

Biznet Sponsorship Asia Pacific Media Forum 2010 Grand Hyatt Bali

Biznet became the Official Broadband Provider for the prestigious event with a regional scale named Asia-Pacific Media Forum (APMF) 2010 which held in Bali Island, Indonesia. APMF is a non profit organization for professionals involved with advertising media and aimed to be the catalyst for the advancement of media knowledge in the Asia Pacific Region. Supported by Asian Federation of Advertising Agencies and International Advertising Association, this event was held for three days activity, with a total of 800 participants from media and professionals advertising in Asia Pacific region. Presented speakers

from various leading companies in the Asia Pacific, the seminars and discussions topic was around how to exploring mobile innovation as the next media frontier, demanding accountability and engaging consumer effectively, The future of TV, Radio, Newspaper program, etc. Biznet's involvement in APMF 2010 event was aimed to strengthen the Biznet brand among the international media and advertising segment and also to keep up the good relations with Biznet's customers which many of them are related to the media and advertising industry.

Biznet Provisioning Team

Imagine if the most up-to-date technology from the world of telecommunications can be used in your building or your own home ... You can easily download your favorite songs, livestream your favorite band's concert and video chat with your friends in different country without any interference. Biznet delivers Fiber Optic directly to your building or home, so you can experience the high quality Internet and network connection using the best technology in telecommunication industry. But do you know people who work behind the Fiber Optic infrastructure? How Fiber Optic can reach into your building or your home?

Here in Biznet, we have an engineering team specialized in telecommunication infrastructure. They work together to accommodate the need of customer in mind and always deliver on time. Biznet Provisioning Team supported by young people with solid technical skills

and brilliant engineering minds mostly graduated from leading universities in Indonesia. In their roles, the provisioning team responsible for development and maintenance of the last-mile network access infrastructure, to minimize the possibility of quality degradation on Biznet service.

Provisioning Team performs their duties by developing and interconnecting fiber optic cable access to Biznet backbone network that already spread in several strategic locations. Construction of the network access is in the form of fiber optic infrastructure using Metro Ethernet and Fiber to The Home (FTTH) system solutions to reach Office Buildings, Apartments, Shops, Commercial, Industrial Estates and Residential area. Metro Ethernet technology, with its high performance and reliability in Layer 2 technologies as well as ring network architecture, are used in most of high rise buildings for Offices and

Apartments. Metro FTTH (Fiber to The Home) system, a Passive Optical Network (PON) technology provides coverage in larger rural area such as small building, shop house and residential. With a remarkable engineering team and the best technology, Biznet can deliver Fiber Optic solution to any of the locations within the coverage area.

"We are proud of our undertaking to deliver the network on target first time, every time. Our key to success here is our consistency to the speed and work standardisation. Through our industry experience, we believe we can always contribute in the development of last mile into customers' network, interconnection and service activation so it can be enjoyed properly."

Top 3 HAPA
GOLF & COUNTRY CLUB

HAPA SIGNATURE GOLF & COUNTRY CLUB 2009-2010

On the Internet there are some tutorials about shutting down a computer from a mobile phone. But, there's a way to shutdown a computer from a mobile phone using PHP. PHP is a scripting language in simple words. It used as server side scripting language, platform independent and open source. That means we don't have to worry about whether the system runs on Windows or Linux. The procedure is really simple. All we have to do is to set up a server on the computer with PHP and execute system command to shutdown the computer.

1. SERVER SETUP

Use XAMPP to set up the server.

Go to XAMPP home page. Download the available package (installer or zip archive).

Now, follow the instruction given on their site to install the server. Actually installation is just unzipping the archive to a directory. The installation will take just around 2 minute.

2.PHP code

- After installing XAMPP, just open up XAMPP directory. Then you will locate htdocs folder. Open that and create a new directory/folder. You can name it anything

you want. Suppose the name of the new folder is shutdown.

- Open the newly created folder shutdown and create a new file with index.php extension.
- Now open up index.php file and place the nice little code if you run windows.

```
<?php
echo 'Shutting down';
exec("shutdown -s -t 30"); //30 means shutdown after 30 seconds
?>
```

3.Creating URL

Go to no-ip.com and register a free sub-domain and point it to the following

<http://YOUR-IP-ADDRESS/shutdown/>

To find out your IP address just visit any site like <http://checkmyip.com/>.

That's it. Now you visit that link with no-ip subdomain from your mobile phone to shut down the computer.

Source: <http://www.techfuzon.com/2009/10/shutdown-computer-from-mobile-using-php.html>

Morris Worm

On 2 November 1988, the first major attack hit the Internet named Morris Worm, disabling 10% of the Internet's 60,000 host computers. Surprisingly it was written by a 23-year-old doctoral student at Cornell University, named Robert Tappan Morris. The Morris worm was part of a research project and was not designed to cause damage, but it was programmed to self-replicate. Unfortunately, the code contained a bug that allowed the worm to infect a single machine multiple times, which resulted in thousands of computers grinding to a halt.

Source: http://news.cnet.com/16-candles-for-first-Internet-worm/2100-7349_3-5438291.html

Security Threats Rise Along with Usage

Hundreds of more sinister attacks occurred as the fast internet users grow. The U.S. Computer Emergency Readiness Team (US-CERT) even stopped counting the number of security incident reports it received in 2004 because attacks against Internet-connected systems had become so commonplace that it felt this figure was getting too big to track.

Source : http://www.pcworld.com/article/159471/the_evolution_of_the_internet.html

Internet VS Electricity Consumption and CO2 Production

Google uses an estimated 15 billion KWh of electricity per year, more than most countries. However, Google generates a lot of their own power with their solar panels.

One Google search produces about 0.2g of CO2. But since you hardly get an answer from one search, a typical search session

produces about the same amount of CO2 as does boiling a kettle.

Spam generates 33 billion KWh of energy every year, enough to power 2.4 million homes, producing 17 million tons of CO2.

First Computer Mouse Look

Long before optical mice became popular, there was this wooden contraption. It was built by Douglas Engelbart in 1964, and consisted of two gear-wheels positioned perpendicular to each other -- allowing movement on one axis.

Source: <http://www.techeblog.com/index.php/tech-gadget/feature-introducing-the-first-computer-mouse>

KASKUS which stands for Kasak-Kusuk meaning “buzzing” in Indonesian, is an online community where people can find, sell and buy stuffs or simply share common interest and information through its over 300 different forums. Its website ranks as the 6th most visited site in Indonesia according to Alexa and has reached more than 1,5 million registered users. It was established in November 1999 and today it has become the largest online community in Indonesia.

KASKUS Networks managed by PT. Darta Media Indonesia, dedicated itself to information technology industry that focuses on community forum based on user-generated content. KASKUS develops and provides various categories of service such as: Forums, Forum Jual Beli (FJB), KASKUS Mobile, and online payment system also known as KasPay. During 10 years of existence, KASKUS has received numerous awards including The Greatest Brand of Decade (2010) from The Marketeers, The Best Innovation in Marketing (2009), and The Best Market Driving Company (2009) from The Marketing Magazine.

It is KASKUS’ mission to continuously bring innovation to their service, improve its quality, as well as maintaining the stability of its networks in order to meet their users’ needs. To better serve the users who have already reached over 1,7 million people, KASKUS absolutely requires a stable and reliable network. It is why KASKUS choose the quality services from Biznet such as Biznet Secure Cage Colocation and Biznet Dedicated Line 30 Mbps. “Until now, Biznet services can satisfy our users’ needs. The number of KASKUSER that increases rapidly every day can be accommodated by Biznet existing connections,” said Andrew Darwis (Founder and Chief Technical Officer of KASKUS Networks).

Simply easier for your secure digital transaction

Experience Double Speed from metroNET

When more is less, you don't have to think twice to break!

Starting from 1 July 2010, Biznet provides you a fantastic value of Broadband Internet service. Biznet recently doubled of the current bandwidth speed for its metroNET services with the same low price. With 2 years contract, you can save more than half of your company's cost and experience high speed Broadband Internet access most of the time.

Check our Latest metroNET Plans!

New Speed	Previous Speed	New Monthly Fee (Rp)	Setup Fee (Rp)
MetroNET 2 Mbps	MetroNET 1 Mbps	1,000,000	1,000,000
MetroNET 4 Mbps	MetroNET 2 Mbps	1,750,000	1,000,000
MetroNET 8 Mbps	MetroNET 4 Mbps	3,000,000	1,000,000
MetroNET 20 Mbps	MetroNET 10 Mbps	7,500,000	1,000,000

*All the above pricing does not include tax
 *with 2 years contract term

metroNET sure will give you the most reliable high speed internet connection you can get. The faster the connection speed then the better experience you can get. It will improve upload and download experiences and make surfing faster and more rewarding. Using fiber optic network, it is impossible to meet high-bandwidth requirements of your

company such as streaming audio and video or high volume data downloads.

 Why worry about the cost of your company's growing demand of internet bandwidth, when you can have the high bandwidth speed everyday for such a competitive price? So what are you waiting for? This is another attractive

offer that surely you don't want to miss.

 For more information about this promo, please call our sales representative at **+62-21-57998888**, call center **500988**, or email **sales@biznetnetworks.com**. Please visit **www.biznetmetro.com** for metroNET standard features and comprehensive terms and conditions.

Marshall Indra

Revenue Assurance Manager
marshall_indra@biznetnetworks.com

“It’s just depend on how we can give a positive reaction”

In the business world, Finance and Accounting is a major part for every company. Every company sure needed right people to handle its financial operation. In Biznet, Marshall works as the part of Finance Division who

responsible in managing all the invoice and collection process as Revenue Assurance Manager.

Marshall, so his nickname, graduated from Bina Nusantara University in Computer Accounting. He began to work at Biznet Networks in June 2007 as Finance & Accounting staff two years after he received his bachelor degree. This friendly and easy going person managed to enter Biznet due to his educational background and remarkable grade. His diligence and thoroughness in work has brought him to be promoted as a manager in a short amount of time. Working as a Revenue Assurance Manager at the time,

Marshall and his team are responsible for managing all invoice and collection process from Biznet customer. With this new position, of course, Marshall found some impression, whether happiness or even sadness. The reason is because that his division often related with different people and different characters. “Because we work in a service company, then to received complain is a fair, it’s just depend on how we can give a positive reaction. Of course by giving a good response in serving every customer would bring a good image to our company as well”, said Marshal.

Marshall always know that he has a great passion to traveling and food. Marshall

loves to try a wide variety of food from different place and country. “It’s good to know that world has a diverse kind of food with good taste and to be able to travel and eat good food is truly a blessing from God”, admitted Marshall. Besides traveling Marshall also enjoys different kind of music, but who ever thought before that this calm person picked Hip Hop as his favorite genre among all. When it came to the hope for Biznet, Marshall hopes that Biznet could become a telco that can provide the best quality of service, “To face competition with other telcos, beside focus on giving affordable price, we have to consider giving the best quality of service to satisfy our customers”.

Ali Zainal Abidin

Network Engineer Supervisor
ali_zainal@biznetnetworks.com

“Hopefully Biznet can continue to expand more fiber optic network”

Ali Zainal Abidin, often called Ali, joined Biznet in July 2008 as NOC (Network Operation Center) staff. Later he was promoted as Supervisor of NOC on January 2010 as he shows his persistence

and determination in work. Ali’s current scope of work is focus on Layer 3 in network operation, which is more complicated than we have thought. According to that, Ali’s duty has to do with IP distribution and bandwidth management of Biznet’s customers.

During his time at Biznet, of course, Ali had experience fun and hard time. “I had the chance to climb Mount Salak together with my colleagues. I felt so proud and happy at the time I conquered and reached the top of Mount Salak” explained Ali eagerly. “But sometimes I have to spend more time for my work

rather than with friends and family, still, I can see this as a challenge and I would always put my biggest effort for the best result” added Ali when being asked about his experiences during his work.

Ali loves everything related to sports when it comes to his hobby. It happened that he’s an adventurous person who likes challenge. “My favorite is football and futsal, I can spend two evening in every week joining football or futsal match, it’s just fun to gather up with your friends and have exercise at the same time”. Besides sport, Ali also loves to watch movie series. “A huge amount

of movie series is just never enough to be watched. My favorites are Chuck, Prison Break, Castle and many more. I just could sit in hours with a nice straight and snacks just to watch my favorite movie series at home”, said Ali. When it comes to his hopes for Biznet, Ali don’t need to think long in finding an answer. He simply defined his hope that Biznet could continue to expand its network in the future. “Hopefully Biznet can continue to expand more fiber optic network to reach every parts of Indonesia, so that Biznet can positioned its company as major telco among all,” marked Ali at the end.

Adhi Safriyansyah, a thirty seven years old man in a big figure and humble personality. Adhi, so is he called, began his career in Biznet on 2006 as Marketing Communication Staff. His diligence and passion due to work resulted in him being recruited as Marketing Communication Supervisor not long after he entered his job. Moreover, with his consistency and speed in following the fast rhythm of marketing work has led him to be promoted as Marketing & Promotion Manager in June 2007. At the current time, his whole duty as manager related to marketing and promotion area, such as making Marketing Plan and Budget, increasing Biznet’s brand and product image, holding events and promotions and many different task

which he usually carry along with his Marketing team.

Adhi personally feels that his educational background in Economic and Social Science and Information Management he gained from Gunadarma University has gave a substantial contribution on his ongoing work. His knowledge in professional information management and competency in marketing and promotional strategy has simplified his job in setting plans and strategies to support Biznet’s product and service in the rapidly changing of telecommunication market. “I strongly believe that we have a great product and a number one quality of service. With a good strategy and a correct timing we

will easily lead our product and service to become the number one in the market”, explained Adhi firmly.

When it comes to family, Adhi usually managed his time to have quality time with his children whenever he offs from his duty. “I always dedicate myself at work but when I come back home, I dedicate myself to me and my home. I’ve been working very hard, and by the time I got home, I’m paying my family back”, Adhi admitted. Beside that, Adhi also usually spend his time for a challenging sport game during his leisure time. “I love sport and I seriously went crazy on basketball. When I’m in the field, I can totally express my soul into the game”. At the end, Adhi expressed his faith on

Adhi Safriansyah

Promotion Manager
adhi_safriansyah@biznetnetworks.com

“I strongly believe that we have a great product and a number one quality of service”

Biznet success in the future. “I truly feel that Biznet could be a leader in telecommunication industry by giving the best contribution for the development of Telecommunication industry in Indonesia”, marked Adhi.

Biznet Milestone

Biznet Networks established in 2000 as an Internet Service Provider to provide Internet solutions for business customers. In 2000, Biznet was using the Wireless and In-Building Ethernet Technology, with the support from a committed and the best engineering team, Biznet Networks started to build its way towards becoming one of the leading Network Service Provider in Indonesia.

With the emerging demand of a very reliable network infrastructure, Biznet Networks realized a lot of companies are depend on a good infrastructure to manage their business. After several research and development, Biznet Networks Engineering Labs Team considered Fiber Optic as the best network and soon started to deploy the Fiber Optic network around Jakarta.

Internet & Technology

From the day computer was invented, there are many malicious programs written by some notorious mind to cause widespread damage to computers across the world. It is known as virus. Initially, there were still less number of privileged people having access to Internet and only a fraction of the PCs were part of network, so it wasn't easy for virus to be spread at the time.

But as the computing technology improved and Internet played a major role in people's life, it is easier for virus creator to attack through Internet and cause more damage in lesser time. Especially in the last decade which has seen enormous amount of damage caused due to virus.

On 1982, Elk Cloner is regarded as the first virus to hit personal computers worldwide. Elk Cloner spread by infecting the Apple II operating system using a technique, now known as a "boot sector" virus. If a computer booted from an infected floppy disk, a copy of the virus was placed in the computer's memory. When an uninfected disk was inserted into the computer, Elk Cloner would be copied to the disk, thus allowing it to spread from disk to disk.

Once a computer has been compromised by a virus, it is usually unsafe to continue using the same computer without completely reinstalling the operating system. However, there are a number of recovery options that exist these days. These actions depend on severity of the type of virus. Plus you can also make a prevention steps to protect your computer, such as installing anti virus and make sure your operating system has the latest updates.

Our path to success

2005

The first development of Fiber Optic Network in Sudirman area with ring configuration using Metro Ethernet technology.Total distance 10 KM.

2006

Biznet expanded coverage to cover more CBD area such as Thamrin, Gatot Subroto and Simatupang area. Total distance 50 KM.

Biznet set up new direct link to Japan and peer with Japan Internet Exchange (JPIX).

2007

Biznet expanded Greater Jakarta. Total distance 250 KM.

Biznet launched Metro FTTH Network, the first Fiber To The Home network in South East Asia.

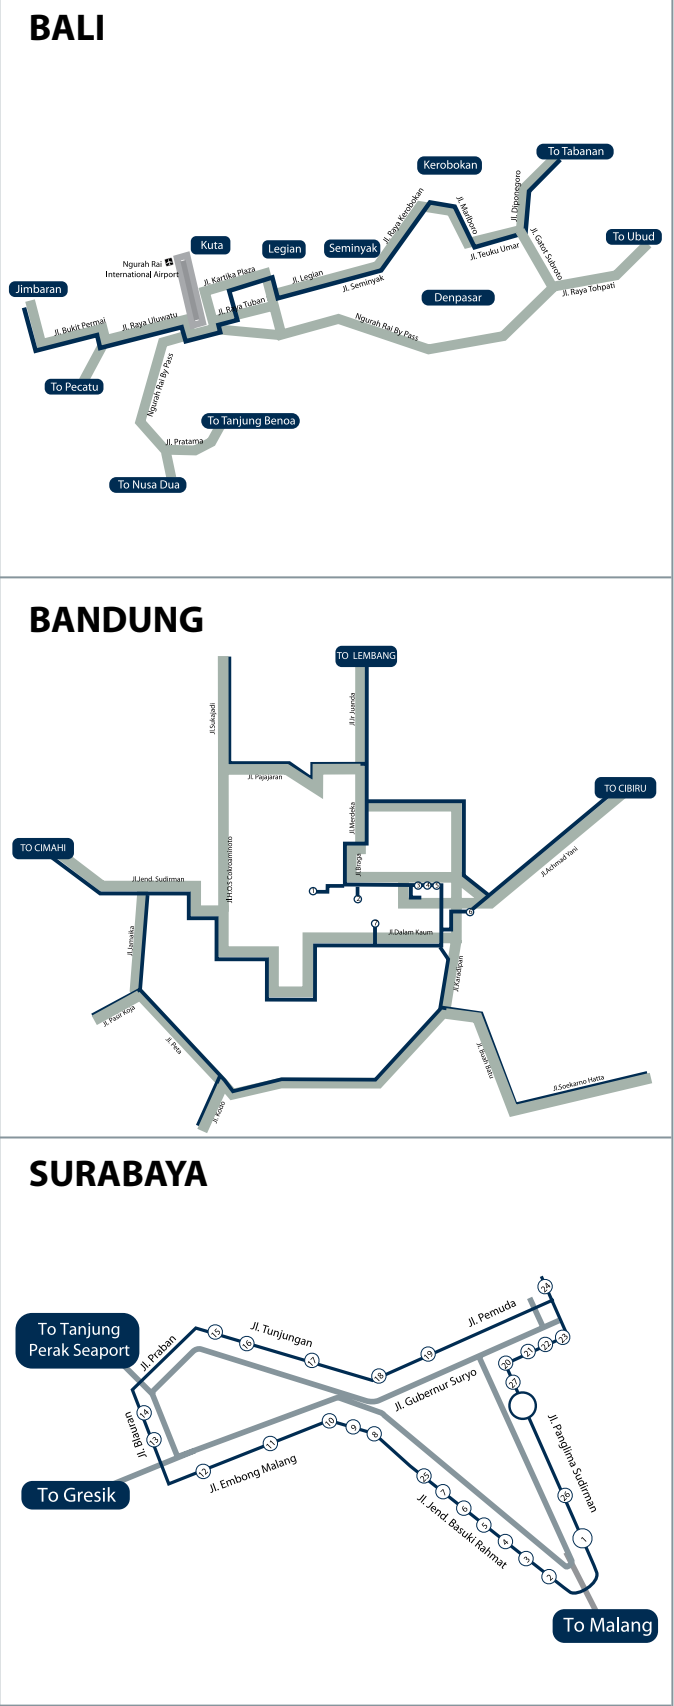

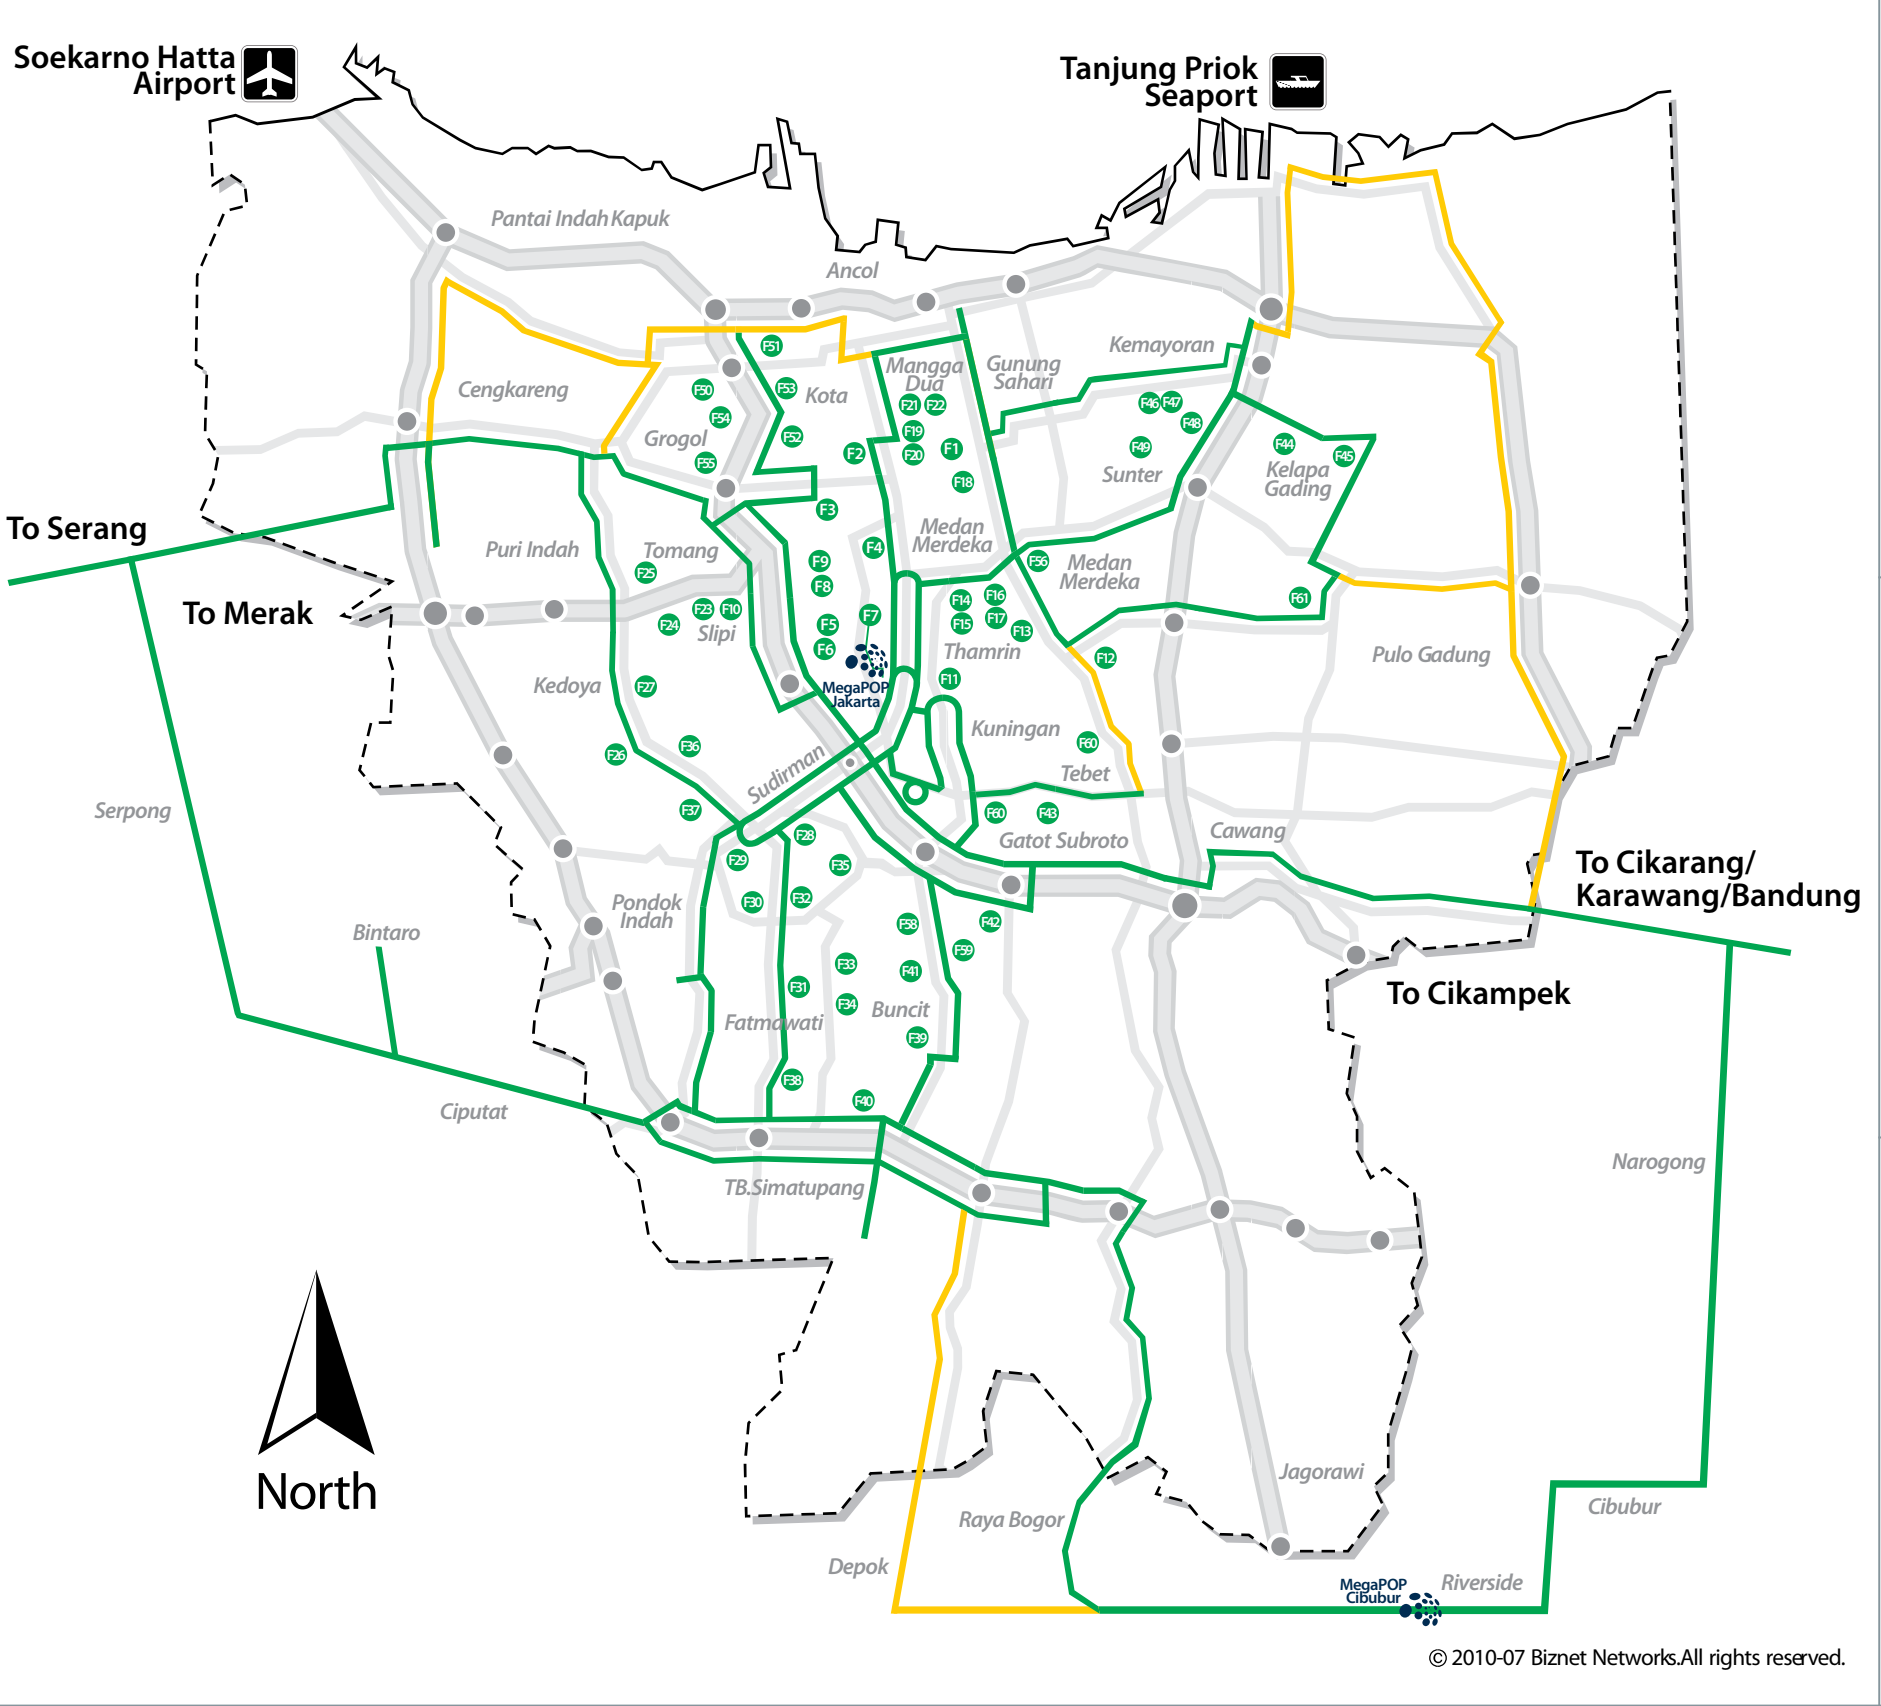

2008

Biznet deployed Biznet InterCity Network between Serang and Bandung to provide connectivity along those areas. Total distance 1000 KM.

2009

Biznet expanded Metro Fiber To The Home Network (Metro FTTH) to Bali Island with total around 30 KM of route installed. Total distance 1200 KM.

Global IP Transit

Internet has become a critical network infrastructure to support business application as well as personal communication. Both business and residential users demand the best service, network performance and pricing to accommodate their requirements. To support those requirements, Biznet Global IP Transit Service is the best choice for stable and robust solution.

As one of the leading telecom infrastructure company in Asia, Biznet offers Global IP Transit with redundant equipments, ultra high-speed connections to all the major Internet backbones and Internet Exchanges, and ensuring routing and bandwidth allocation available at all time. Biznet Global IP Transit is the best choice for you and your customers.

Biznet Global IP Transit services provide direct connection to multiple Global Tier-1 Internet Providers and leading Internet Exchanges in the world. Using our service removing the hassle to negotiate direct peering agreement with major content providers in Asia, Europe and USA.

Proven Performance

Biznet Global IP Transit provides you with a superior Internet experience. We guaranteed 99.8 percent Service Level Agreement (SLA) uptime, the lowest packet loss and latency, direct connection to major Internet Exchanges in the world using multiple submarine cables as redundancy. Many telecom carriers, ISPs and enterprises have been using this network since year 2000.

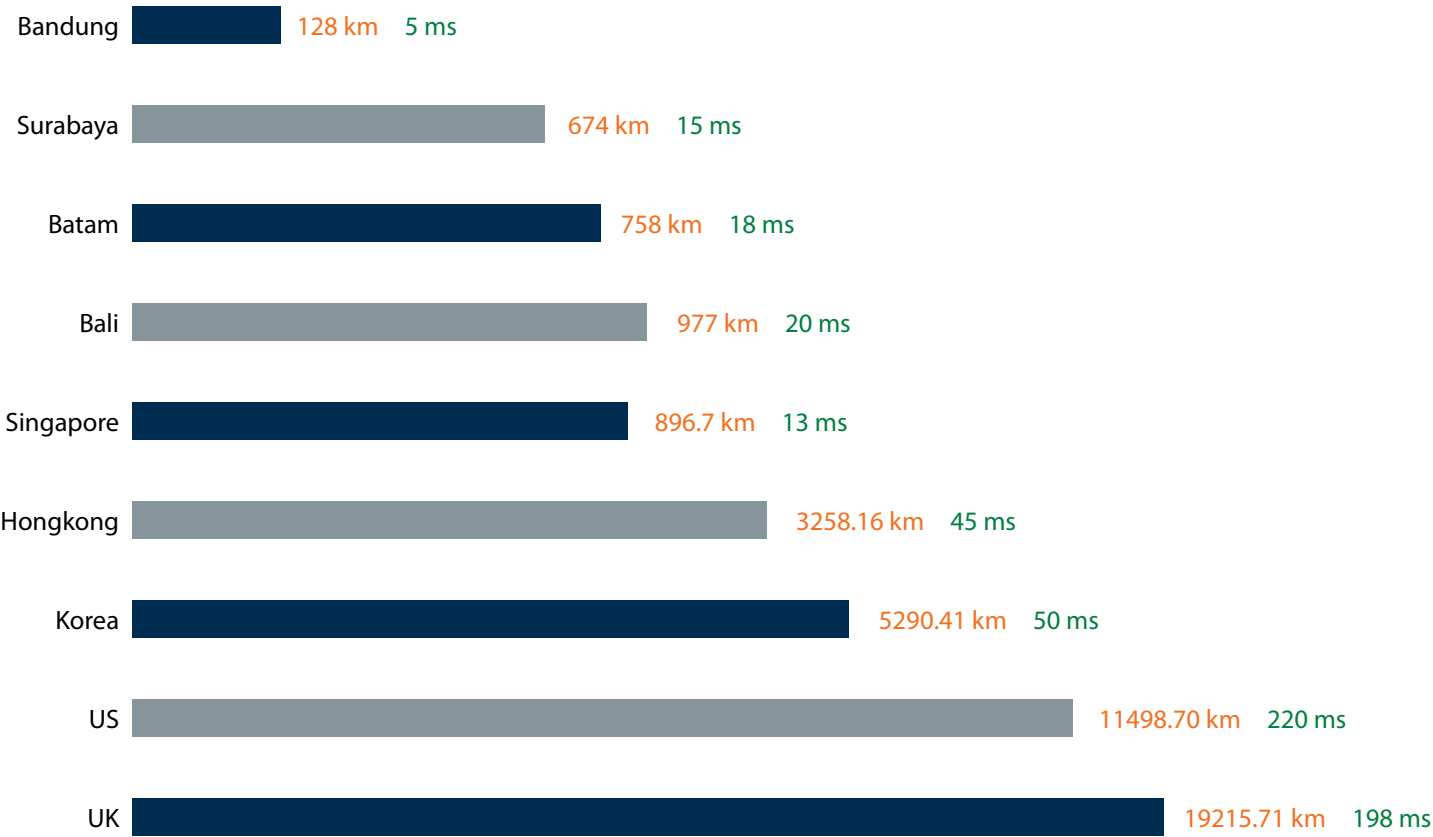

World-Class Premiere Care

Biznet Premiere Care is the heart of our proactive support service to our customer. Network performance constantly monitored 24x7 at Biznet Global Network Operating Center facility in Jakarta, Indonesia. With multiple support level system to ensure all the issues resolved quickly and effectively to minimize downtime for you and your customer satisfaction.

Global POPs Location

Biznet GlobalPOP located in Jakarta - Indonesia, Singapore, Hong Kong - China, Tokyo - Japan, Seoul - South Korea, Palo Alto - USA and London - UK. Biznet is actively expanding our GlobalPOP coverage.

From Jakarta

Website you usually visit:

www.kompas.co.id = 0 ms www.kaskus.us = 0 ms www.detik.com = 1 ms

Distance Ping time

Ping times above are the average of total time spent in reaching the destination from your computer through Biznet Network in normal condition.
Ping time indicated in milli-seconds (ms), 1 ms = 1/1000 second

Biznet Networks has direct connectivity (Direct Peering) to major cities and Internet Exchanges in the world to minimize the route to reach destination for shorter hops.

- Facts:**
- Ping stands for Packet Internet Groper which created by Mike Muss in 1983
 - 'Ping' inspired from active submarine sonar which usually makes ping noise as it meet an object.
 - 'Ping' has the analogy when sending a package of data; it will receive a package of data too as a reply.

Why Do You Choose Biznet As Your Provider?

One of the leading telecommunication provider in Indonesia

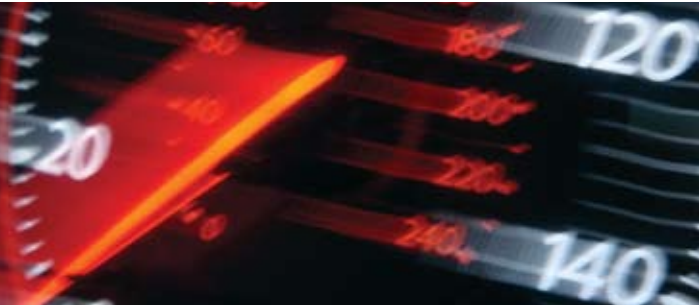

Using Fiber Optic, that provides the most reliable network connection

24 hours professional customer care

Endless cool monthly prizes

World Class Speed
