## Improving Telecommunication Network for faster economic growth!

Telecommunication is very important for people to communicate via long distance, especially for business that happened globally. By using telephone, email, chat or video conference people around the world can communicate instantly and cheaper, without having to travel to the destination. Internet has become the most critical telecommunication infrastructure in the last few years, both for business and personal use.

Biznet is actively building the most advanced telecommunication network in Indonesia. With current coverage in Jakarta, Bali, Bandung and Surabaya, we plan to add more cities in the next few months, in order to bring better telecommunication infrastructure in those areas. Last June 2011, we added 2 (two) additional GlobalPOPs in Manila, Philippines and Sydney, Australia. We hope that our network expansion would simplify your way to communicate with others and bring more success to your daily activities and business operations. By June 30, 2011, we have built fiber optic network in more than 100 districts (kelurahan), 385 buildings, with a total cable route of 1,900 km.

We believed by building better telecommunication infrastructure in Indonesia, Indonesia will have faster economic growth in the next few year. We are very proud to be part of Indonesian modern infrastructure. We welcome your opinion on how we can improve our services.

Happy Reading.

#### Still looking around for the fastest Fiber Optic Network for your business?

Biznet has all the options for you. From Small Medium Business service up to Enterprise grade service, we're here for you. As your Internet and Data Communication getting more important for your business than before, why you gamble with other providers. Biznet has been around for 10 years, with over 1,900 KM of our own fiber optic routes, this proves our investment commitment, service quality and technology innovation. Want to know why leading Indonesian businesses and companies trust on us? Please contact our Account Executive via phone +62-21-57998888, email sales@biznetnetworks.com or visit www.biznetnetworks.com for more information regarding our company, services and customer references.

A world without telecommunications would not be possible; society has made itself so used to this type of technology that the world would end up collapsing if it was taken away. The reason in the tremendous growth of telecommunications is because, as people and cities throughout the planet grew, we needed a better way to relay messages between one another.

Communication is extremely an important aspect, not only for people around the world, but also for small and large businesses. Businesses would be lost without technological advancements and a lot of companies would cease to exist. Telecommunications is a must and it provides better awareness of the society we are living in, where it makes us communicate easier.

#### What is Telecommunication?

Telecommunication is the process of sending and receiving the electrical signals over all large distance. This is the process of communicating the data and information such as voice, data, video, audio and graphics.

There are certain mediums of a telecommunication system such as coaxial cable, fiber optics, radio frequency and many others. The modern telecommunication system involves all the telecommunication technologies and this system is designed by the telecommunication engineers and due to the invention of the fiber optic cables; more bandwidth is available for the data transfer and communications.

#### **Why Telecommunication Network Matters?**

Telecommunication Network can be defined as high speed, high capacity, long-distance communications system comprising of computers, electronic switches, cables, satellites, wireless transmitters and antennas, which linked multiple remote sites (www.businessdirectory.com).

Telecommunication network has many types and each offers significant benefits:

• Wide area network: In wide area network, a computer can communicate with another computer over a very large distance even across the country.

- Metropolitan area network: Metropolitan area network covers the area of nearly one city or county.
- Local area network: The communication of computers in a very small geographical area is known as local area network.
- Campus area network: Campus area network is a network which is restricted to the small geographical area that limited to the university or a building
- Personal area network: Personal area network is a network which is limited to an individual
- Virtual private networks: Virtual private network is built on the principle of secure encrypted network in order to provide complete security to the users
- Client server network: The client server network is a network which is connected to the LAN at one end and the back up server at the other end.
- Peer to peer network: network computing: Microsoft office online is the good example of such kind of network. Peer to peer network is used for connecting only those computers which have copy rights to use each other's resources.
- Network computing: when a computer uses network browser to connect to the other computers in the network it is known as network computing

Biznet Networks is one of the leading fixed telecom and multimedia operators in Indonesia, providing Network, Internet, Data Center, and Cloud Computing services. Biznet also owns and maintains the most advanced fiber optic network in Indonesia.

Biznet operates a global network in 4 (four) continents – 8 (eight) major cities to peer directly with the Internet Exchanges and Tier-1 providers, which are London – UK, Hong Kong – China, Manila – Philippines, Palo Alto – USA, Seoul – South Korea, Singapore, Sydney – Australia and Tokyo – Japan.

To constantly support its network services, Biznet has prepared a new address space allocation using Internet Protocol version 6 (IPv6) technology. The IPv6 address allocation was prepared due to the number limitation of Internet Protocol version 4 (IPv4) where it's predicted it cannot be added or used by the end of 2011. Biznet offers IPv6 allocation for Dedicated Line service and IPv6 Webproxy for MetroNET and max3 internet services. If you have further questions about IPv6 or any of Biznet services, please contact our Customer Care via email **customer\_care@biznetnetworks.com** and call center **500988** or **+62-21-57998888**.

Although you cannot find the sand there, it will be a memorable experience just sitting on the beach waiting for the sunset.

Makassar is known as the South Sulawesi provincial capital, one of the perfect locations for your vacation. From 1971 to 1999, the city was named Ujung Pandang after a precolonial fort in the city, and the two names are often used interchangeably.

In the 16th century, Makassar was the dominant trading center in eastern Indonesia. Thanks to success, the city has a variety of an interesting historical heritage to be visited.

As far as the eye can see, the city is surrounded by the sea that is so vast and beautiful, and well known to many tourists. Although you cannot find the sand there, it will be a memorable experience just sitting on the beach, waiting for the sunset.

Makassar offers an interesting historical heritage to be visited, Fort Rotterdam. The fortress housed the former residence of past Kings of Gowa and their families. Until now, the mansion is still well maintained, even becoming one of the

best historical attractions in Makassar. Another unique beach is the Losari Beach, stretching approximately 4 km. You can enjoy the sunrise and sunset without having to worry about cramming into a spot with other visitors.

Moving slightly towards the mountains, Makassar hides another attractive tourist destination, known as Bantimurung Waterfall. This waterfall is located in the town of Maros, approximately 140 km from the city. The waterfall is 20 m wide and 15 m tall, and because of its location in the mountains, the water is still very pure.

Besides the coolness that keeps the tourists coming back, Bantimurung Waterfall is one of habitat area for countless species of the world's rare butterflies, aptly named "The Kingdom of Butterfly" by Dutch colonies.

Since September 2009, Makassar was home to the Trans Kalla—the biggest indoor theme park in Southeast Asia and third largest in the world. The theme park is located in Tanjung Bunga.

If you are interested to visit Makassar, you don't need to worry. The city has an easy access: Makassar's Hasanuddin Airport.

Accommodation varies, with hotels starting from IDR 300.000 for an adequate room service. And getting around the city of Makassar using the Pedi cab only cost IDR 15.000.

# Creating Successful Business Presentations

Along with computer literacy, professional presentation skills are becoming a new survival skill in the workplace. People enjoy presenters who are inviting, engaging and informative.

So let's say developing and delivering business presentations, will be just like most functions in business; learn the formula, practice the skill and gain competency as a presenter. Here are what you need to consider when you are about to give presentations:

#### **Building Your Confidence**

Nervousness is normal because it shows that the presentation is important to you. To cope with it, you should rehearse until you are comfortable with your material. You also need to keep eye contact with your audience. This will help your audience know that you are speaking to them and you show confidence.

#### **Prepare Your Presentation**

In creating your presentation, think like a reporter and answer the "who, what, why, how, and where" questions. Good presentation will have an Opening that could capture audience attention and lead into the presentation topic. Then, a Body which has a series of points with each point beginning with a statement of fact followed by supporting material. The presentation should ends with a Closing to review and a call to action or a memorable statement. You also need to ensure that your presentation can run on any computer.

#### **Timing your presentation**

Keeping the number of slides to a minimum will ensure your presentation will not become too long and drawn out. It will also avoid potential problem of continually changing slides during the presentation that could possibly distract your audience.

#### Keep your audience focused

A business presentation needs a strong focus. Do not list every last feature of a product or business service; focus on a few clear and compelling benefits that potential customers can readily understand.

#### Keep your audience interested

You should also combine photos, charts, graphs and videos related to your presentation to add variety and keep your audience interested in your presentation. When using a design theme or design template choose one that is appropriate for the audience. A clean, straightforward layout is best if

you are presenting to business clients. Select one that is full of color and contains a variety of shapes if your presentation is aimed at young children. Choose a font that is simple and easy to read and keep all fonts large enough so that people at the back of the room will be able to easily read what is on the screen.

#### **Be Clear in Your Presentation**

In international business situations, the audience will likely include clients or prospects with diverse native languages. Speakers should make it as easy as possible for the audience to stay engaged and understand the business benefits of the products or services. The best way to achieve this is to keep the language and the delivery simple, clear and businesslike.

#### **Allow Time for Audience Questions** Allowing audience to discuss a presentation gives the speaker an

additional opportunity to overcome objections and explain the benefits of the product or business services in particular situations.

## Prevent Your Social Media Identity from Hijackers

Nowadays, people are recognizing the benefit of being on social media and advertizing on social media platforms such as Facebook, Twitter and LinkedIn. Their strong presence allows them to better engage with their surrounding community.

However, social media lacks accountability. Individuals easily set up false social media profiles, impersonating someone as Hijackers.

Hijacking by abusing social media profile may hurt your reputation, ruin social and professional connections and can also cause emotional stress. To prevent it, it's important to understand how it is done.

#### 1. The Easy Way

The easiest way for a hacker to gain access to your account, is to type in your email address, click "I forgot my password" and then hack into that email address to find your password. To prevent this from happening, be sure to check that your email is secure, and that your contacts aren't receiving any strange marketing emails from you in their inbox. A

red flag is to find a password in your inbox that you didn't request.

#### 2. Social Probing

If your accounts aren't secure, your hacker will be able to guess your password by doing some 'social probing' of your life or industry. Whatever you do, don't use personal passwords – like the names of your cats, your wife or your favourite sport. These hackers love it when your password is easy to guess from basic profiling. Don't make it easy for them, or you could end up without a Facebook business page.

#### 3. The Computer Spy

A hacker gets you to download something that secretly opens a keylogger on your computer. Everything you type is then recorded

and sent to them. They discover your passwords. They go SPAM crazy on your accounts. Whatever you do, do not open strange files in your inbox or that you come across online. Check them with a spyware program to make sure they're clean!

#### 4. Gone Phishing

This is the nastiest trick in their box of tricks. A hacker creates a fake page and domain name that looks almost exactly like your account login page. They then email you some warning or update caution, with a link that takes you there. You type in your username and password. They hack your account. Never, ever, ever click on foreign email links – even if they look legitimate. Instead use Google or type in the domain name directly.

#### **Facebook Security**

- Use an intricate, difficult password
- Change your security settings to https, instead of http
- Do not click on links sent to you by friends for no reason
- Be suspicious of personal contact on your page

#### **Twitter Security**

- Don't access your account on unfamiliar computers
- Don't ask Google to save your passwords because its easy
- Come up with a super complex answer to their security question

#### World's first video arcade game

The first video game was invented by Willy Higginbotham. Willy was no teenage computer wizkid In 1958, bored by the displays of the Brookhaven National Labs annual open-day exhibition, Willy designed a tennis game

simulation, the world's first video game, It was called Tennis For Two. http://didyouknow.org/worlds-first-video-arcade-game/

#### More than 2 billion computers and 4 billion cell phones made

Since the dawn of electronics Apple has sold more than 180 million iPods, some 2 billion TV sets and a similar amount of radios were sold, some 2 billion computers have been manufactured, and more than 4 billion mobile phones each found a new pair of ears. (That's a lot of electricity being gobbled up every day!) http://didyouknow.org/more-than-2billion-computers-and-3-billion-cell-phones-made/

#### First video recorder weighed as much as a small car

The video recording machine was invented

by the Ampex corporation of California in 1956. The first video recorder, the Ampex VR1000, stood 3 ft 3 in (1,1 m) high [or

more than 6ft when fully assembled and weighed as much as a small car: 1,466 lb (665 kg). http://didyouknow.org/first-audioand-video-recordings/

#### First audio and video recordings

Magnetic recording was invented in 1898 by Valdemar Poulson of Denmark. But it wasn't used for recording music. Called the "telegraphone," it was used to record telephone messages by applying magnetic pulses to a steel wire.

#### Bluetooth

Bluetooth, is named after a tenth-century king of Denmark and Norway, Harald Bluetooth. Harald was known for uniting various warring tribes in Denmark and Norway, as the technology is intended to unite various other technologies. http://www.productusp.com/some-interesting-facts-abouttechnology.html

#### 161 Exabytes

According to Columbia Journalism Review, in 2006 alone, the world produced 161 exabytes of digital information. To put this amount into perspective: if you include all the books ever written in the known history of human kind, the amount of written information will not come close to 161 exabytes. As a matter of fact, 161 exabytes is 3 million times the amount of written information in all the books worldwide. The number of exabyted is expected to increase dramatically in the next few years. http://bestfunfacts.com/technology.html

The bank which was founded in 1946, formerly known as Bank Negara Indonesia (BNI), was the first bank established by the Indonesian government. BNI has a vision to become the pride of the nation, leading banks, prominent and leading in the service and performance is always put forward the excellent service to all customers. As one of the bank that has been trusted in the eyes of the people of Indonesia, until now BNI is continously improving performance and services provided, and ultimately customer satisfaction become the highest values will be given.

Services and Banking products provided to customers of BNI such as, savings, credit and banking services for both individuals and corporations. To continue to attract the attention of existing customers and prospective new customers, BNI continues to provide lucky draw, this certainly

makes a difference from other leading banks. "The purpose of our promotions that we issued primarily to provide rewards to our customers who are very loyal to us, we feel very honored to continue to serve our customers," said Dadang Purwaganda as Electronic Communication Manager.

In the era of highly sophisticated technology today,BNI also encouraged to provide services by using latest technology, including SMS and internet banking. Services using e-online system, provides convenience for customers who are often mobile, so customers with high mobility can still perform banking activities wherever they are.

With more than 19, 315 employees and 1,458 branches are spread almost all over Indonesia, BNI only entrust to technology investments that have been experienced. Biznet was becoming the perfect choice

for BNI in order to deliver the best quality service to their internal operation and customers. BNI is using Biznet Global IP Transit for Internet Access and Biznet MetroWAN for connecting to the branches and data centers.

BNI trusts Biznet as their network provider because Biznet has a reliable service with a competitive price and also available in most major cities in Indonesia. Yogi Habibie, BNI IT Managers, explain that Biznet Services are great in with what they have because of their experience. "We are very much satisfied with the current service that we are using now, besides of their readiness to be called 24x7, they're really mastered what they provided to us, and it all really help me well," said Yogi Habibie.

For More Information about BNI, please visit www.bni.co.id

Biznet Technovillage is an integrated high tech & modern village located in Cibubur area, West Java – Indonesia, with 9,000 m2 of Grade A Office Space and 6,000 m2 of Tier 3 Data Center, targeted for research, telecom, media and outsourcing companies for their operation office, research center, media production, outsourcing center and backup facility. It's located around 35 KM South of Jakarta, with direct access from Jagorawi Highway. It's also supported by Biznet Metro Fiber Optic Network for Data Communication and Internet services.

#### **Didit Adithya**

#### Lab Engineer

didit\_adithya@biznetnetworks.com

"Biznet can continue to look forward to future and be more successful in the future"

Didit Aditya began working at Biznet since February 2007 as a Customer Care specialist. His educational background

Catur Pamungkas, a 29 year old man, started to join in Biznet in January 2008 as Web Developer in Information System Team. His responsibilities are developing and maintaining Biznet websites for public information and intranet applications to support internal operation

Catur was graduated in 2005 from UNESA (Surabaya University) in Computer Information System, is closely related with the job he is involved now. "I love to do something related to computers, especially with the software," said Catur with enthusiasm.

He feels his work as his hobby. He can do it with joy, even though with many obstacles in it. Catur gives a little secret of how we can work well, we must do anything that we love, and then everything will be lighter, and eventually any obstacles that we have passed was a very valuable lesson.

Besides his hobby in everything related to computer, Catur also has a hobby which is strongly opposite with his serious figure; he loves to watch foreign movies, especially the super hero theme. At first, Catur really liked the comics published from Marvel and

DC Comics, when the comics were created to movies, makes him became the biggest fan of them.

When asked about his expectations for Biznet, Catur hope that within the next 10 years Biznet will cover the whole of Indonesia. "Hopefully Biznet can help the government programs to provide Internet and telecommunication services in all of Indonesia, so that people in rural areas can also receive and find information or events that are happening in the world," he said.

Officer. Being part of the Legal team has become his goal since he was in college at the Law Faculty in University of Indonesia. According to him, a background in legal education provides a huge opportunity to work in big companies like Biznet.

Due to his hard work, Teguh was promoted to Legal Manager in December 2009. His responsibility covers all legal matters of the company, such as agreements, licenses and permits. Teguh cooperates with other departments to ensure Biznet meet all its legal requirements to run the business. This makes the father of Mikail Kenzie

Athallah, his son, spend more time to be at the office.

Although, this doesn't mean that he will put his family second to his work. "My family is the most important thing in my life, they always support me in every step I take and always relieve my stressed when I come home from a busy office," said Teguh. At the weekend, Teguh often take his family to new locations that have never visited before. Teguh also often visited his relatives, he feel that a relationship with the family is very important today. "Stay in touch with relatives for me is very important, although they only want to know our

health, because if we are in problem, certainly relatives and friends will help us," said Teguh in explaining the culture of our society that has begun to fade away.

When asked about his hopes for Biznet in the future, Teguh said that hopefully Biznet became a world class international telecom company, and gained trust from the people both in Indonesia and international. With the growing business owned by Biznet, Teguh strongly believe that Biznet will be able to compete with major telecommunications companies in Indonesia.

majoring Physics at the Institute Pertanian Bogor (IPB), for almost 5 years, was not dampen his curiosity in technology. This makes him well developed during his working period in Customer Care Team.

Didit was promoted in February, 2010 as R&D Engineer at Engineering Labs. Biznet Engineering Labs is an innovation team that develops, tests and creates new products and services for both internal operation and customer. He has involved in several projects such as IP-PBX, Call Center System, Biznet Hotspot and Desktop Virtualization. Due to his work, which is always associated with new technology development, makes

Didit become a dynamic and openminded person, especially in absorbing the development of new sciences. "This is a huge challenge for me, to apply the latest technology into the existing system is an easy thing, but when we're able to work it out, that's a satisfaction," Didit excitedly explained.

In his spare time, Didit likes to do sports, especially cycling. "With cycling, besides it's relaxing, it's also makes me healthier." Besides exercising, he is also a knowledgeable person, at this time Didit is registered as student at Sekolah Tinggi Manajemen Informatika dan Komputer ERESHA, to get his Master degree. He is still active to deepen his knowledge

about for science and technology, especially in computer science. Didit, who's still in early semester feel that despite of his full-time job, does not deter his motivation to get more knowledge. "I hope with better knowledge and my persistence for learning, it can be useful for Biznet development," said Didit with blushing face.

When asked about his hopes for Biznet, Didit said hopefully Biznet can continue to move forward. "With the innovation that we continuously developing, Biznet surely can grow and successful in the future." Didit said with enthusiast.

#### Our path to **success**

#### 2005

The first development of Fiber Optic Network in Sudirman area with ring configuration using Metro Ethernet technology. Total distance 10 KM.

#### **2006**

Biznet expanded coverage to cover more CBD area such as Thamrin, Gatot Subroto and Simatupang area. Total distance 50 KM.

Biznet set up new direct link to Japan and peer with Japan Internet Exchange (JPIX).

#### **2007**

Biznet expanded Greater Jakarta. Total distance 250 KM.

Biznet launched Metro FTTH Network, the first Fiber To The Home network in South East Asia.

We've put together a timeline of the history of search engines to understand the roots of this technology which has become such an important part of our world.

1957-1990: Previously on the Internet

In 1957, ARPA (the Advanced Research Projects Agency was created to foster UStechnology. Some ten years later, DARPA marked the beginnings of the Internet. In the late 80s, number of Internet hosts broke 100,000, and people started to get lost. Emtage creates FTP indexing search tool Archie.

#### 1990-1993: WWW, and WWWW

the World Wide Web, created by Tim Berners-Lee and released by CERN (the **European Organization for Nuclear** Research) in 1991, was starting to take off. The World Wide Web became the most important Internet service.

Search engines have changed the way we find information, conduct research, shop for products, entertain ourselves and connect with others. Behind almost every online destination, social network, cell phone and online newspaper, is a search engine. Search engines have become the connecting force and directional guide to everyday life.

#### 1995-1997: Dot-Com Rising

Metacrawler, Excite, AltaVista, and more search engines appear. Yahoo, actually a directory, is the leader, but AltaVista launched in 1995 and gained popularity.

#### 1998-2002: Google et al

It's late 1998. Stanford's Larry Page and Sergey Brin reinvent search ranking technology becomes the most successful search engine in the world. Google, where everyone looks for something online. Google, with its 200 million hits, and over 3 billion indexed WWW pages has become undeniably the

most relevant search engine of today. And we all can see Google is constantly coming up with new, focused services to enhance web search.

Search engine has changed the way information delivered. These days, we can find information easier and faster. You can search any information at anytime and anywhere. Simply, information is at right your fingertip. Search engine optimization becomes bigger and bigger field, with experts trying to boost rankings of commercial websites.

#### 2008

Biznet deployed Biznet InterCity Network between Serang and Bandung to provide connectivity along those areas. Total distance 1000 KM.

#### **2009**

Biznet expanded Metro Fiber To The Home Network (Metro FTTH) to Bali Island with total around 30 KM of route installed. Total distance 1200 KM.

#### **2010**

Biznet launches Cloud Computing service and starts Biznet Technovillage Project, a Tier 3 Data Center located in Cibubur, West Java.

## Get More Offers From MetroNET

A fast, reliable and affordable Internet connection for Small Medium Business is an important issue today. Fiber optic technology is the latest technology that has been adopted in long-distance communication, using glass fibers that can transmit data up to gigabits per second and deliver information remotely.

Biznet Networks owns and operates the most advanced fiber optic network. With fiber optic technology, potential connection interference will be lowered comparing to copper cable and wireless technology.

Biznet offers MetroNET, a Broadband Internet service suitable for small medium business users, that provides secure, fast and reliable connection. With several options available from 1 to 20 Mbps, you can select variety of access speed, depending on your requirement and budget. MetroNET uses Biznet Metro Fiber Optic infrastructure to deliver the fastest and the most reliable service.

With MetroNET, you can also have a chance to get the cool monthly prizes that will be raffled monthly and grand prize at the end of Dec 2011. With those prizes now you are able to enhance your digital lifestyle.

Biznet Networks offers IPv6 Webproxy for MetroNET services. To access webproxy, you can go to http://webproxy6.biznetnetworks.com. If you have further questions about IPv6 or any of Biznet services, please contact our Customer Care via email at customer\_care@biznetnetworks.com and call center 500988 or +62-21-57998888500988 or +62-21-57998888.

## 2011, The Era of Tablet PC

#### Motorola Xoom Tablet PC

Motorola Xoom has a super powerful dual-core processor and Android 3.0 (honeycomb), the Android platform designed specifically for tablets. With its 10,1-inch HD widescreen display, you could enjoy HD video in a thin, light and powerful tablet.

#### **eLocity A10 Android Tablet PC**

The eLocity A10 Android tablet comes with a 10.1" 1366×768 resolution full multi-touch display, Tegra 2 dual-core 1Ghz processor, standard HDMI output port, and a USB 2.0 port that can be used as a host or peripheral, It is probably the highlight of the device. As for the screen, eLocity A10 is equipped gorilla-glass.

A Tablet PC is a lightweight touch screen and portable device. Similar to laptop, but it is smaller and lighter. Currently, the best Tablet PCs are available with either a Google Android or Windows 7 operating system. So what is your tablet PC choice for 2011?

eLocity A10 Android tablet might be the first tablet to launch this year with Tegra 2 dual-core 1Ghz processor.

#### **Apple iPad 2 Tablet PC**

Apple has announced the secondgeneration iPad to be launched on 11 March 2011. Apple iPad 2 tablet PC would be "thinner, faster, FaceTime, smart covers, 10 hour battery". iPad 2 is predicted to more amazing; 33 percent thinner and up to 15 percent lighter, designed with two cameras for FaceTime video calling, and more.

#### **BlackBerry PlayBook Tablet PC**

RIM's BlackBerry PlayBook is poised to attack the iPad on the basis of specs, such a 1GHz dual-core processor, 1GB of RAM, micro-HDMI output, symmetrical dual-core processing, and support for 1080p HD video playback. It also features both rear-facing (5MP) and front-facing (3MP) cameras, capable of HD video recording and still photos.

#### **Asus EP121 Windows 7 Tablet PC**

The Asus Eee Slate EP121 Windows 7 tablet features a 12.1-inch touchscreen LED display. Windows 7 is definitely a

good choice for tablet PCs, and Asus is set on showing that to everyone with their new Windows 7– the most powerful tablet on the market.

North America.

#### **From Jakarta**

Facts:

- Ping stands for Packet Internet Groper which created by Mike Muss in 1983
- 'Ping' inspired from active submarine sonar which usually makes ping noise as it meet an object.
- 'Ping' has the analogy when sending a package of data; it will receive a package of data too as a reply.

### Why Do You Choose Biznet As Your Provider?

Using Fiber Optic, that provides the most reliable network connection
