Explore Your Creativity & Innovation at Biznet Technovillage

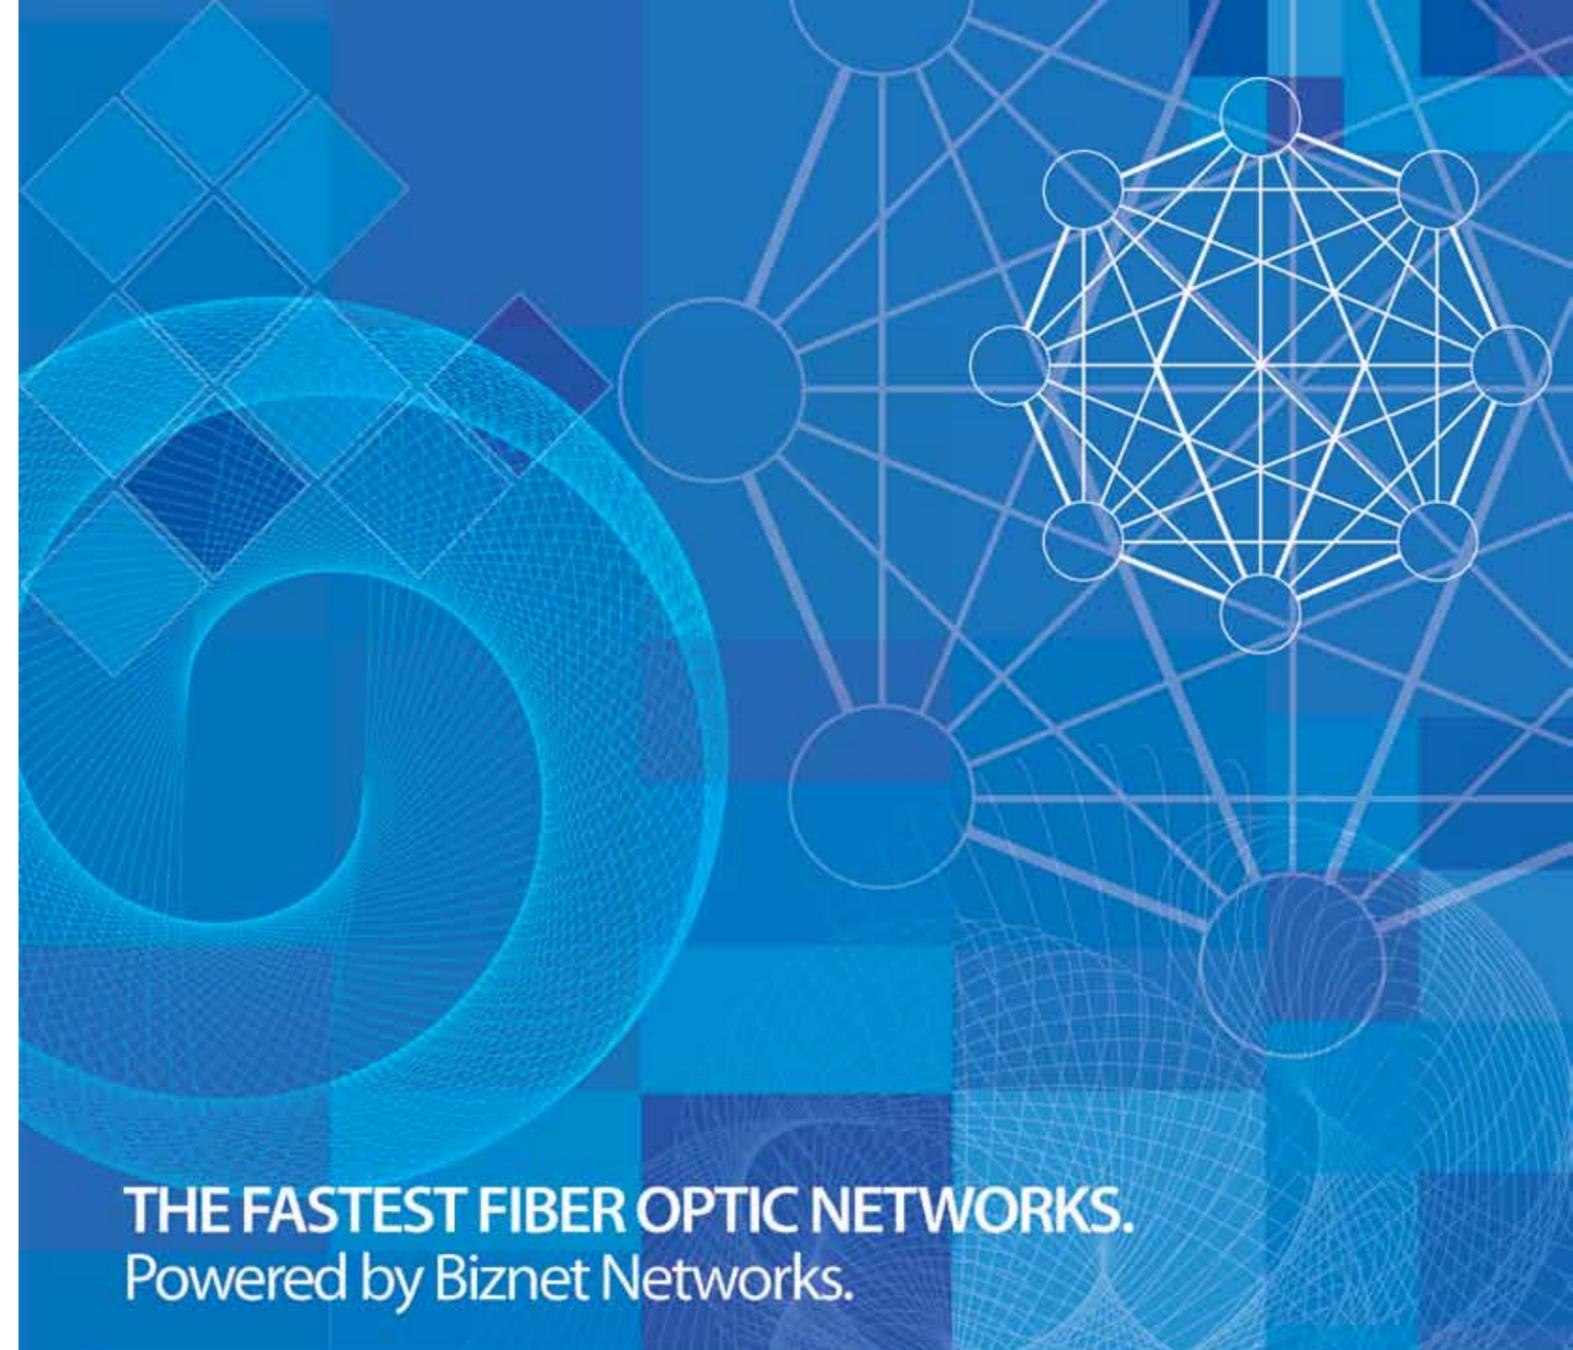

In today's fast-paced telecommunication and multimedia industries, creativity and innovation are considered in many inter-disciplinary views, playing an important role in all levels in business, society, and many other sectors. Creativity and innovation have transformed the way we engage with one and another and created a better life.

We believed only with creative and innovative ideas, a company can survive the business in the future. Biznet Networks is actively developing all of the management and employees to think what service or application will be required by a company/business and what kind of content a family and children want to watch. For a person to become creative and innovative, he/she needs perfect environments that really support him/her to think creative. Not only the company culture, but also office design and landscape, plays an important role to create a creative and innovative environment.

To achieve that target, we are constructing Biznet Technovillage, an integrated high tech & modern village located in Cibubur, West Java area. It consists of Tier 3 Data Center Space, Grade A Office Space and Retail Space. Biznet Technovillage was designed based on those aspect including protecting the nature, trees and plants to create a perfect office environment that can drive the creativity & innovation.

We hope that with our continuous technology & facility development, service innovation and human capital development, we can contribute to increase Indonesian economic in the future.

Happy reading!

THE FASTEST FIBER OPTIC NETWORKS.
Powered by Biznet Networks.

Still looking around for the fastest Fiber Optic Network for your business?

Biznet has all the options for you. From Small Medium Business service up to Enterprise grade service, we're here for you. As your Internet and Data Communication getting more important for your business than before, why you gamble with other providers. Biznet has been around for 11 years, with over 2,500 KM of our own fiber optic routes, this proves our investment commitment, service quality and technology innovation. Want to know why leading Indonesian businesses and companies trust on us? Please contact our Account Executive via phone +62-21-57998888, email sales@biznetnetworks.com or visit www.biznetnetworks.com for more information regarding our company, services and customer references.

www.biznetnetworks.com

Biznet Technovillage: Home of the Next Generation Technology Companies

With great ideas, comes innovation that could lead to a better thing. This inspiration has become our motivation to keep developing new ideas, making improvement in service and technology, both in national and international scales.

Align with Biznet's missions, to build modern telecom infrastructure to support Indonesian people, business and education and to provide more advanced technology and services to Indonesian people to lower the digital gap with other developed countries, building the next generation infrastructure is the only way to achieve them. Biznet

Technovillage and Biznet Metro Fiber Optic complement each other to deliver advanced business and consumer based services in the future.

Biznet Technovillage is an integrated high tech and modern village located in Cibubur area, West Java. It is about 35 KM South of Jakarta Central Business District (CBD) and 20 KM North of Bogor. Biznet Metro Fiber Optic Network supports Biznet Technovillage for Data Communication and Internet services. Biznet Technovillage is designed to be comfortable working environment

with abundance of plants and trees that will create encouraging environment that produces fresh ideas and creative thinking.

Biznet Technovillage is targeted for research, telecom, media and outsourcing companies for their operation office, research center, media production, outsourcing center and backup facility. And with access to Biznet Metro Fiber Optic Network and Biznet TeraPOP Data Center, it allows you to connect your mission critical application to your Head Office and Branch Offices.

Just as energy is the basis of life itself, and ideas the source of innovation, so is innovation the vital spark of all human change, improvement and progress – **Ted Levitt**

To support daily activities, Biznet Technovillage offers complete facilities such as Office Building, Data Center Building, Business Center, and Village Center.

Office Building

Biznet Technovillage offers 5,000 m2 of Grade A Premium Quality Office Space. The facility is suitable for TV and Digital Studio, Disaster Recovery Office and Research & Development Labs, equipped full backup power generator and cooling system to support your operations.

Data Center Building

Biznet TeraPOP offers 9,000 m2 Tier-3 Standard Data Center with high quality, reliable and scalable data center solutions, and is designed to meet Financial Institution and Broadcasting Company's specification.

Business Center

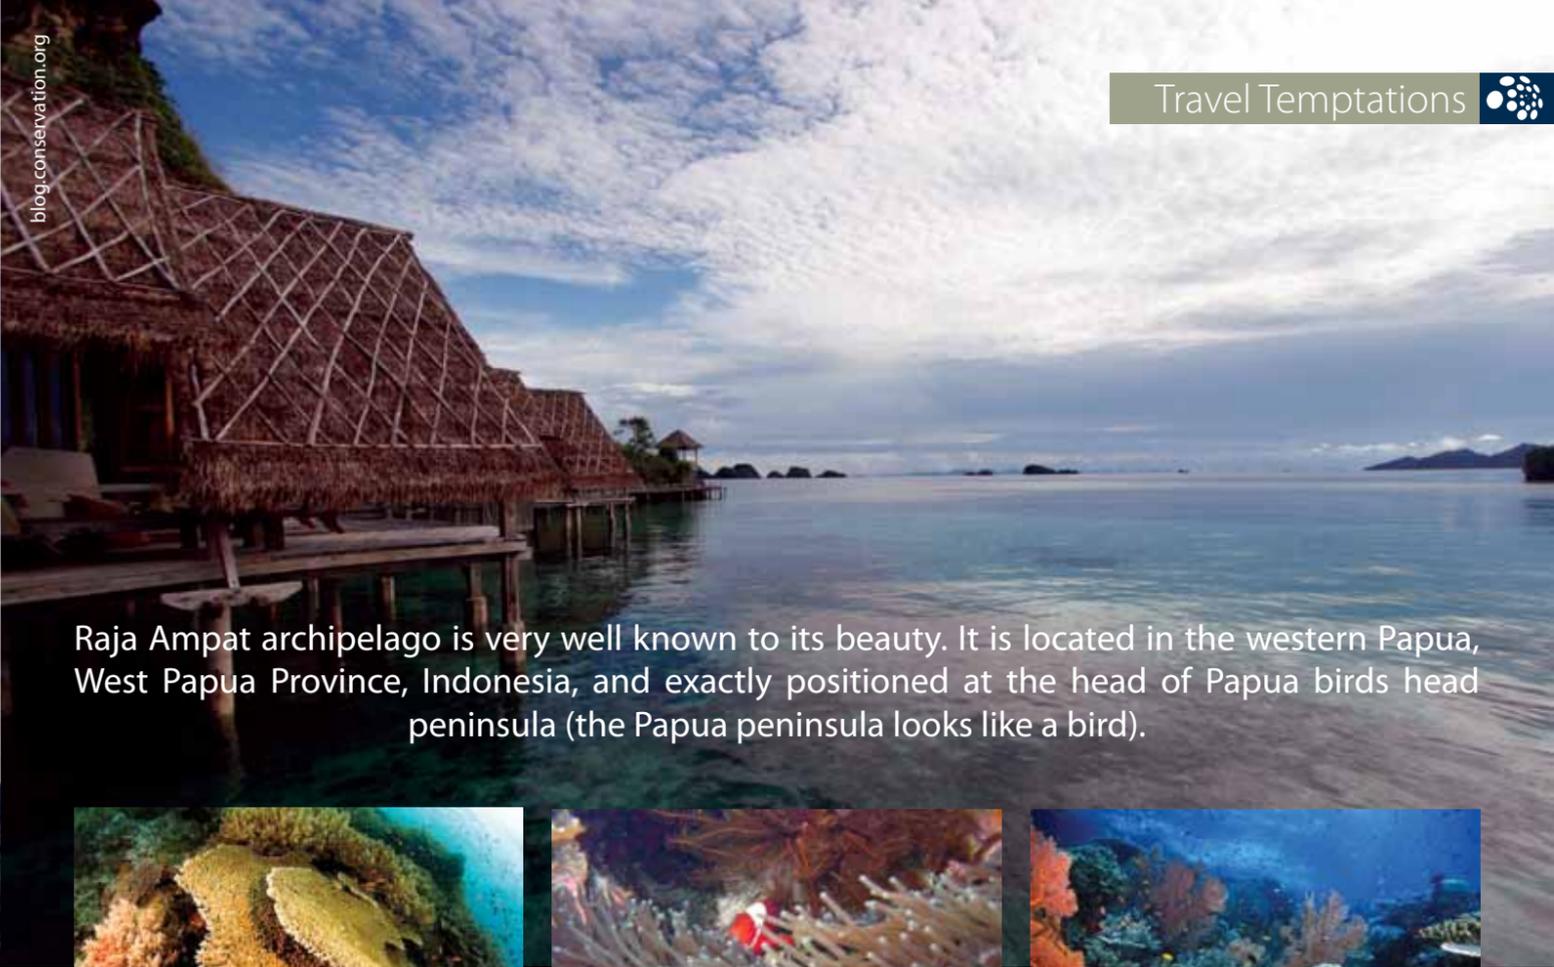

Biznet Techspace offers small to medium fully furnished office space and secretarial services.

Village Center

Village Center is the central hub for the whole village, and contains dining lounge, mini market and utility room.

For further questions or inquiry about our facilities, please contact our enterprise team via e-mail enterprise@biznetnetworks.com or visit www.biznettechnovillage.com.

Raja Ampat An Exotic Place in Indonesia

Raja Ampat archipelago is very well known to its beauty. It is located in the western Papua, West Papua Province, Indonesia, and exactly positioned at the head of Papua birds head peninsula (the Papua peninsula looks like a bird).

www.kmbidadari-cruises.com

marthen-welly.tripod.com

www.kaskus.us

The archipelago has a strong potential tourism attraction, especially in sea dive. Moreover, it starts to become the top destination to divers who have enthusiasm and interest in Indonesia's diving spot. For some people like researchers, Raja Ampat is known as the richest place to find marine biodiversity. Papua and, particularly, Raja Ampat is quickly recognized as one of the most diverse and pristine reef ecosystems in the world.

Raja Ampat Archipelago consists of Waigeo Island, Misool Island, Salawati Island and Batanta Island. The origin of Raja Ampat name itself, is a myth that was developed through many years and different stories exist in different communities. The myth is telling about a woman who found 7 eggs, which 4 eggs hatched into four princes. They got separated and each became a powerful king in Waigeo, Salawati, Misool East and Misool West. The other 3 eggs turned

into a ghost, a woman, and a rock. A strange myth indeed, yet, Raja Ampat is still a very exotic place to visit.

According to the various sources, the water in Raja Ampat is one of the best water around the world for diving sites. In fact, it may also be recognized as number one for the completeness of underwater flora and fauna at this time. Approximately 450 species of coral had been identified during the two weeks of research around the area because of its location.

A team from Conservation International, The Nature Conservancy and National Oceanographic Institutions (Lon), and Indonesian Institute of Sciences (LIPI) had done a quick assessment in 2001 and 2002. As a result, they noted that there were more than 540 species of hard corals (75% of the total species in the world), more than 1,000 species of reef fish, 700 types of mollusks, and

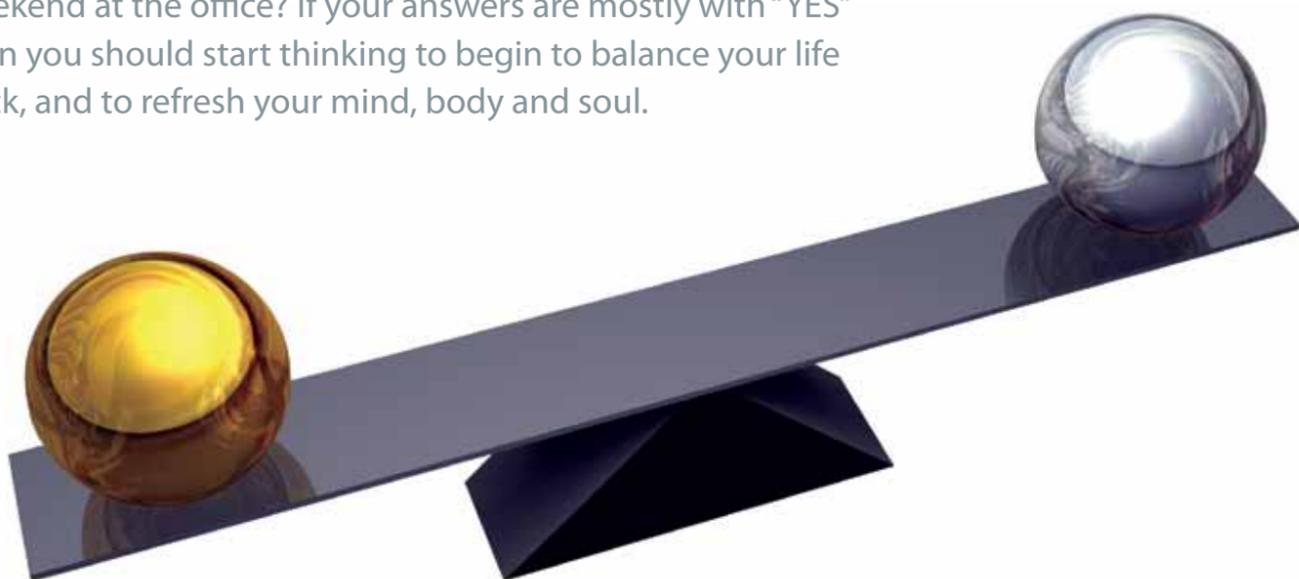

the highest record for gonodactyloid stomatopod crustaceans. This makes 75% of the world's coral species is in Raja Ampat Archipelago. None of the place with the same area has a number of coral species as much as this.

Move slightly to the society, there are traditional fishermen families who live and run all activities in small villages, and located far apart in different islands. They are very friendly and welcome to visitors. If you plan to go there, you can have an easiest way to get there by flying to Sorong via Jakarta or Singapore. Domestic travelers can also fly via Makassar or Manado. Presently, a tourist center and harbor are being constructed. In the near future, there are plans for three resorts to be built on Nyandebabo and Batbitiem, Waiwo, and Waigeo Selatan Islands. But, in the meantime you can choose the alternatives to stay in Sorido Bay Resort, Kri Eco Resort, Island Camp, and Boathouse.

How to Balance Your Work and Personal Life

Working in the metropolitan city like Jakarta, demands you to arrange priorities to be able to survive in a high competition market. Do you feel you spend more hours in the office? Rarely meet your family? And spend your weekend at the office? If your answers are mostly with "YES" then you should start thinking to begin to balance your life back, and to refresh your mind, body and soul.

Work-life balance is a concept where you manage priorities between work and personal life. In daily life, two things are very important, first, we have to work hard to support our family life and second, we must consider ourselves to be happy. The way to balance between work and personal life for every person will be different, and ones may feel that working with a very high level of high pressure is reasonable. So it is time for you to change your paradigm. Here are some tips & tricks so you can restore the true meaning of your life.

1. Make an Early Start

By starting your activity earlier, does not mean you should rush to do all your activities. You can have relaxed time in the morning and it will help you to become more focused for the rest of the day.

2. Learn to Well Manage Your Time

This sounds very simple. But when you can manage your time well, you will get it balanced. For example, do not make any appointment on weekend; let your weekend be private time for you and your family. To manage your time during office hours you should not force yourself without a break. Take five minutes to rest your mind from work-related, will help you to take out the pressure out.

3. Share Your Job

Your "Tray In" is piling up more than "Tray Out", it is now the time for you to share the work with your colleagues. By sharing the work will help you to ease your pressure. It will be better if you could get your work completed one by one, rather than you let your work pile-up and let it incomplete.

4. Be Passionate With Your Job

Do what you love and love what you do. Find a job that you passionate about, for example, if you enjoy dealing with people, perhaps you could choose the job as Public Relation or if you love to travel around the world, you could become a journalist in traveling magazines. There are many job options out there, you only need to find what is right for you.

5. Keep Your Personal Life Private

Doing your work outside the office hours indicates you have devoted your mind into it too much, so you will not have time to think about what can make you happy. Few things you could try on your weekend. First, you keep yourself from Blackberry, notebooks and other things related to your work. And second, you can have your "me time" to refresh your mind and your health.

To facilitate your work while in the office and minimize work delays, make sure your Internet connection does not slow down when you need to send your job report to your boss. Make sure you choose Biznet's Internet Services for your office. If you have Small Medium Business, you can get MetroNET 2 Mbps service for Rp. 1,000,000/month or if you have large office or need dedicated fixed IP Address, you can get Dedicated Line 768 Kbps from Rp. 4,000,000/month. For further inquiries regarding Biznet Internet Services, please call +62-21-57998888, email to sales@biznetnetworks.com or visit www.biznetnetworks.com.

The Sexiness Spicy of Mexican Flavors

If you are a person who loves culinary, you must be quite often enjoy variety of foods from various countries. And, if you haven't tasted the Hot Latin food yet, you should try the sexiness flavors of Mexicano. This flavor comes from Mexico peculiar chili; Jalapeno & Nipor, making the spicy sensation unique and stronger than usual impressed the sexiness of Latin country. Here we give you options to choose the best Mexican restaurant with your pocket and desire.

16 August 2011
Biznet Networks Regular Cloud Computing Workshop

Biznet Networks has monthly event to educate and share information about Cloud Computing. Participants were exposed to Cloud Computing development, Technology, and Cloud Computing methods.

August - September 2011
New Branch Locations in Bekasi, Depok, Serang and Tangerang

Biznet Networks has opened 4 new branches in Bekasi, Depok, Serang and Tangerang, including our fiber optic coverage in those areas to meet customers demand for reliable, faster and affordable Data Communication and Broadband Internet services. With several expansion projects in progress such as Biznet Technovillage and Biznet Metro Fiber Optic Network, Biznet has shown its commitment to expand its service reaching more customers and improving Indonesia's telecommunication infrastructure.

Network Operation Center

Network Operation Center (NOC) is a division that manages and controls computers and network equipments for a company or organization. They also monitor the alarm if there is certain condition that may require special attention to avoid degradation or down time on the network.

Typically large sized organization or company is recommended to operate its own NOC to ensure high uptime level of the Information Technology's infrastructure. As a leading telecommunication and multimedia operator, Biznet Networks operates a Global Network Operation Center from MidPlaza 1, 9th Floor at Jalan Jendral Sudirman 10-11, Jakarta 10220 – Indonesia, that manage our NationalPOPs and GlobalPOPs. POP or Point of Presence is an artificial demarcation point or interface point between communications entities (http://en.wikipedia.org/wiki/Point_of_presence).

Biznet Networks' Network Operation Center is responsible for:

- To manage network equipments, network links, backbone infrastructures and 3rd party network provider to achieve Service Level Agreement (SLA) of 99,8%.

- To design a robust NationalPOPs and GlobalPOPs network to support current and future growth
- To design an effective network solution based on customer requirement

"Sometimes, there is a customer who used third party last mile provider so it takes longer time to coordinate. Nevertheless, there are no significant constraints", said Agus Ariyanto, Biznet Networks' Internet Network Manager.

Biznet Networks operates NationalPOPs in Jakarta, Bandung, Serang, Surabaya and Bali GlobalPOPs in Hong Kong - China, Kuala Lumpur - Malaysia, London - UK, Manila - Philippines, Palo Alto - USA, Seoul - South Korea, Singapore, Sydney - Australia and Tokyo - Japan.

Ways to Avoid Computer Viruses

As an internet user, PC or notebook perhaps could be considered as the important devices that has been closed to us and almost used everyday. Sometimes, while we are working, our computer can suddenly lack out and completely destroy our work. There are two possible reasons; your computer had broken or invaded by the virus. Virus, here, has a different meaning from virus that causes illness. It is a computer virus, a software program that has been created by a human.

Computer viruses are as old as the personal computer. The intention of the virus is to cause chaos and destruction to the computer. Although most of the cases they are limited to the software, there have been some issues in which virus had damaged a piece of hardware. Some viruses are relatively harmless, they drive pop-up ads appear and that would be slow down your computer. While others can "hijack" your computer and use it for illegal activities like hacking, spamming, or identity theft.

You have probably thought about in what ways you could possibly prevent a computer virus from entering your machine. Here are some possible actions to prevent your computer from virus invader :

1. Install reliable anti virus programs – From the first moment you turn your computer on, you should have a trusted anti virus program. Even though you have a machine that has not been hooked up to the Internet, a reliable anti virus program is still needed to keep your computer saved.
2. Install anti-spyware and anti-malware programs – As good as the best anti virus programs are, they sometimes need a little bit of help. They can help prevent computer viruses from doing any damages on your machine.
3. Avoid suspicious websites – A good virus protection program will alert you when you visit a website that attempts to install or run a program on your computer. And if you get a warning, don't go back to the sites, because you may end up with a bug you can't get rid of.
4. Never Open Email Attachments Without Scanning Them First – The most common way viruses spread throughout the Internet is via email. Make sure you use an email client that scans all email attachments before you are allowed to open them.
5. Set up Automatic Scans – Many of the top anti-Spyware programs have a setting that allowed the program running automatically when you turn on your computer. However, it would be better if you scan it daily to prevent the virus sticking too long in your computer.
6. Stay Away From Cracked Software – Cracked Software sometimes being an alternative way to some people for not using the genuine ones for any reason. Yet, it will harm your data as well, because files from cracked software are almost always infested with advanced bugs and they are difficult to detect.
7. Watch Your Download – Download is one of fun activities in Internet, but because it is so easy to access, it is also can be easy to sneak in the virus along for the ride.
8. Install a Firewall – A firewall is a program that screens incoming Internet and network traffic. Along with your virus program, it can help preventing unauthorized access to your computer.

Jakarta Future Exchange Selling with Trust

Jakarta Future Exchange (JFX), a company powered by 50 employees, has a vision to become the leading commodity futures trading system, which is capable of providing a trusted mechanism Price Discovery, the reference price of commodity producing acclaimed, owned innovative products of interest as a means of alternative investments and risk management that is transparent, organized, fair, efficient and effective.

With the development of technologies in these days, JFX simplify trading activities for customers via online

through Jakarta Future Exchange Electronic System. This system must be supported with appropriate technology as well, so that in the process of buying and selling, will not be disrupted due to poor technology system.

Biznet Networks was the first option for JFX regarding the needs of data communication and data center technologies. By using the Co-location service, Virtual Private Server (VPS) service, MetroWAN service and Dedicated Line service, JFX confident that stability of technology provided by Biznet Networks will provide good

service to all JFX customers. "Biznet has provided the best service to support our business operation with responsive service that makes us feel comfortable. If we have problems related with network performance or our website, Biznet helps us immediately and easily" said Mrs. Andam Dewi as the Head of Research & Business Development Division.

TIER 3 DATA CENTER

Biznet Technovillage is an integrated high tech & modern village located in Cibubur area, West Java – Indonesia, with 9,000 m2 of Grade A Office Space and 6,000 m2 of Tier 3 Data Center, targeted for research, telecom, media and outsourcing companies for their operation office, research center, media production, outsourcing center and backup facility. It's located around 35 KM South of Jakarta, with direct access from Jagorawi Highway. It's also supported by Biznet Metro Fiber Optic Network for Data Communication and Internet services.

For further questions or inquiry about the facility, please contact our Enterprise Team via email enterprise@biznetnetworks.com or visit www.biznettechnovillage.com.

In 2000, Demetrius earned his title as Associate Degree in Applied Music from Boxhill TAFE Music Institute (Melbourne). Upon his return to Indonesia, Demi continued his study at University of Pelita Harapan, majoring in Communication and earned his Bachelor of Social degree in 2005.

In 2007 Demi joined Biznet Networks and became part of Marketing Communication team. His responsibility was to work with all team members to create a marketing plan and execute it. The responsibility of marketing is not easy. "We have to be creative in a way to introduce the brand that we brought

in", he said. Thanks to his educational background which was related to creativity and communication, those has become a great advantage for him to plan the marketing strategy, so he can go through all the tasks easily.

Because of his strong commitment in carrying out his work, starting on 1 January 2011, Demi was promoted as Direct Sales Supervisor for South Jakarta Branch. His duties and responsibilities include Direct Sales recruitment, training, placement and coordination. He is also in charge in managing and monitoring Direct Sales Team member, creating work program, scheduling as well as strategy

plan. He needs to make sure the Direct Sales Team can achieve Sales Target based on strategy that he created.

During his spare time, besides playing music, Demi has several hobbies that he does with his friends, such as airsoft-gun especially by holding a skirmish battle at abandoned buildings or secluded jungle-like area. He is also an animal lover, especially with dogs, and he likes to cook as well.

When asked about his hopes to Biznet, Demi said, "Biznet needs to have a leader who is outstanding, enthusiastic, reliable and responsive manner to

Demetrius Ariaditya

Direct Sales Supervisor - South Jakarta Branch
demetrius_ariaditya@biznetnetworks.com

"Biznet needs to have a leader who is outstanding, enthusiastic, reliable and responsive"

build corporate culture through two-way communication. Because through encouraging dialogue then the strong values will be formed in each of individual."

Nur Aida Hasya

West Java Branch Supervisor
nur_hasya@biznetnetworks.com

"Hopefully Biznet can continue to grow and become the leader in Fiber Optic Network Development"

Hasya graduated from University of Islamic Bandung in 2001, majoring in Communication Management. In 2010,

Hasya eventually joined Biznet and became part of the Sales & Marketing Executive for Bandung Branch. Hasya was responsible to sell Biznet's services and create Biznet Brand awareness in Bandung area.

While working as a Sales & Marketing Executive, there was a lot of challenges she was facing ups and down, "Selling is something that cannot be directly perceived by potential customer. It requires greater effort, because they must be convinced by facts, not just promises. Become a part of Biznet Marketing team was very exciting, because I was able to elaborate my creativity," said Hasya enthusiastically.

Thanks to her hard work over the years, starting from 1 August 2011, Hasya got promoted to be Bandung Branch Supervisor. With her new position, Hasya earned the trust to boost branch revenue by creating the sales & marketing plan, supervise and give support to the entire team. Her approach to all her team is kinship. "I think when we are dealing with our colleagues, I believe kinship approach will be more acceptable to our corporate culture. With this approach, we can make communication running more effective and minimize barriers between fellow employees".

To balance her work time and personal life, Hasya often spend her spare time

to gather with family in Jakarta. "Every weekend I have always been to Jakarta to gather with my family. They are like my stress relief after five full days I have dedicated my mind only for work". Hasya also enjoys traveling so much, she thinks with traveling to other cities or countries, she can explore something new and different, combining with unique and exciting experiences.

Finally, Hasya expressed her hope for Biznet, "Hopefully Biznet is able to achieve one of its missions, to reduce the digital gap with other developed countries, and hopefully Biznet can continue to grow and become the leader of Fiber Optic Network Development, especially in West Java".

Aidil Putra

Premiere Care Supervisor
aidil_putra@biznetnetworks.com

"Hopefully Biznet always be the leader - the trend setter for telecommunication & multimedia industry both in Indonesia and the world"

Aidil Putra who is often called Aidil, graduated from University of Gunadarma

in 2000 majoring in Computer Engineering. Aidil began his tenure at Biznet in 2006 and joined Customer Care team. At that time Aidil was assigned to receive incoming phone, mail and live chat and solve problems for both existing and potential. Supported by educational background he had in college, it has been very helpful for Aidil to explore more about his work.

Thanks to his persistence, starting on 1 January 2010, Aidil was promoted to become Premiere Care Supervisor. With higher responsibilities, he is now in charge in Premiere Care Division to deal with customers who subscribe Biznet

Premium Services such as Dedicated Line, MetroWAN and Co-location services. The scope of work as a Premiere Care Supervisor starts from operation plan, including the shift scheduling for the whole team to monitor during 24x7, to Customer Relationship Management (CRM) monitoring, which will record all customer incidents (complaint, request or question). By using CRM, Premiere Care Team can monitor all incidents from customers and ensure all complaint, question or request can be addressed in order to achieve service excellence.

In his spare time, Aidil who has interest in music since childhood, also works in

the world of Indonesia music. Aidil speaks his heart through music, "Speak through music is very exciting for me, I'd love to please people from the music I created and see them enjoy it, especially when it is appreciated by people around," told Aidil with great enthusiasm.

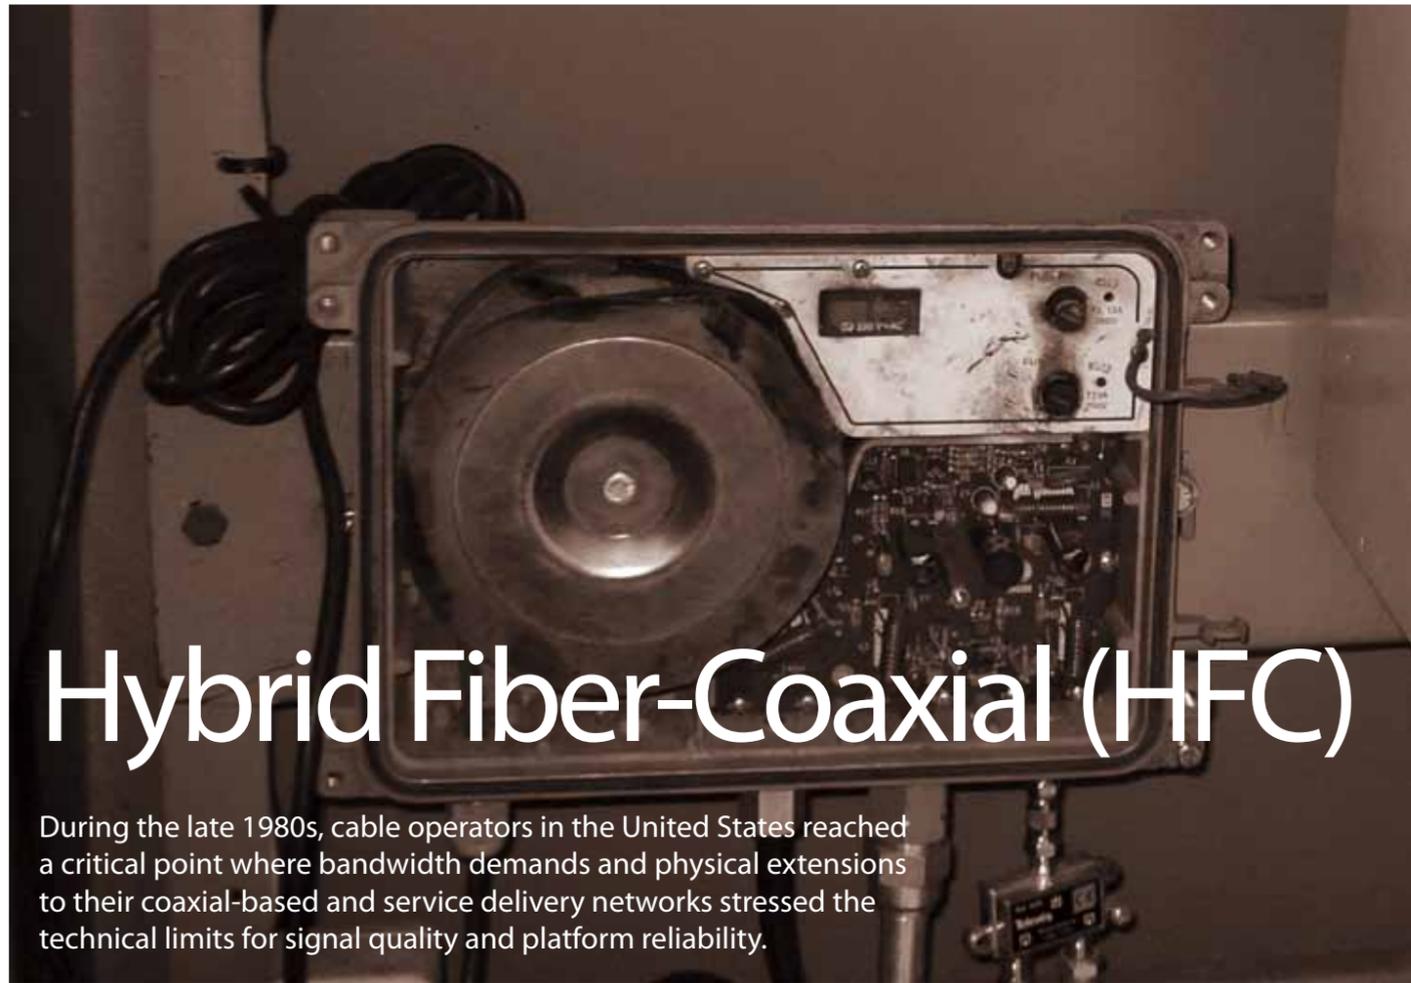

When asked about his hopes for Biznet, Aidil said "Hopefully Biznet always be the leader - the trend setter for telecommunication & multimedia industry both in Indonesia and the world, with a management system that continuously evolving, innovating and surviving to be able to face changes throughout the time."

Biznet Milestone

Biznet Networks established in 2000 as an Internet Service Provider to provide Internet solutions for business customers. In 2000, Biznet was using the Wireless and In-Building Ethernet Technology, with the support from a committed and the best engineering team, Biznet Networks started to build its way towards becoming one of the leading Network Service Provider in Indonesia.

With the emerging demand of a very reliable network infrastructure, Biznet Networks realized a lot of companies depend on a good infrastructure to manage their business. After several research and development, Biznet Networks Engineering Labs Team considered Fiber Optic as the best network and soon started to deploy the Fiber Optic network around Jakarta.

Hybrid Fiber-Coaxial (HFC)

During the late 1980s, cable operators in the United States reached a critical point where bandwidth demands and physical extensions to their coaxial-based and service delivery networks stressed the technical limits for signal quality and platform reliability.

In response to cable operators' demand for a solution that addressed signal quality and reliability, the industry looked toward adapting existing fiber optics technologies.

The initial application of broadband fiber based platforms was targeted to reduce the cascading effects of active electronic devices. Within a short time, the cable industry considered other services. Cable operators recognized the need to evolve their networks to support two-

way interactive services and growing customer expectations. The result was development of a hybrid network which integrated fiber optic cables and devices with coaxial cables and RF based devices as a function of service based network requirements.

This architecture was named the Hybrid Fiber-Coaxial (HFC) network and moved fiber closer to the customer. HFC network is a telecommunication technology in which optical fiber cable and coaxial

cable are used in different portions of a network to carry broadband content (such as video, data, and voice). An advantage of HFC is that some of the characteristics of fiber optic cable (high bandwidth and low noise and interference susceptibility) can be brought close to the user without having to replace the existing coaxial cable that is installed all the way to the home and business.

Our path to success

- 2005**

The first development of Fiber Optic Network in Sudirman area with ring configuration using Metro Ethernet technology. Total distance 10 KM.
- 2006**

Biznet expanded coverage to cover more CBD area such as Thamrin, Gatot Subroto and Simatupang area. Total distance 50 KM.

Biznet set up new direct link to Japan and peer with Japan Internet Exchange (JPIX).
- 2007**

Biznet expanded Greater Jakarta. Total distance 250 KM.

Biznet launched Metro FTTH Network, the first Fiber To The Home network in South East Asia.
- 2008**

Biznet deployed Biznet InterCity Network between Serang and Bandung to provide connectivity along those areas. Total distance 1000 KM.
- 2009**

Biznet expanded Metro Fiber To The Home Network (Metro FTTH) to Bali Island with total around 30 KM of route installed. Total distance 1200 KM.
- 2010**

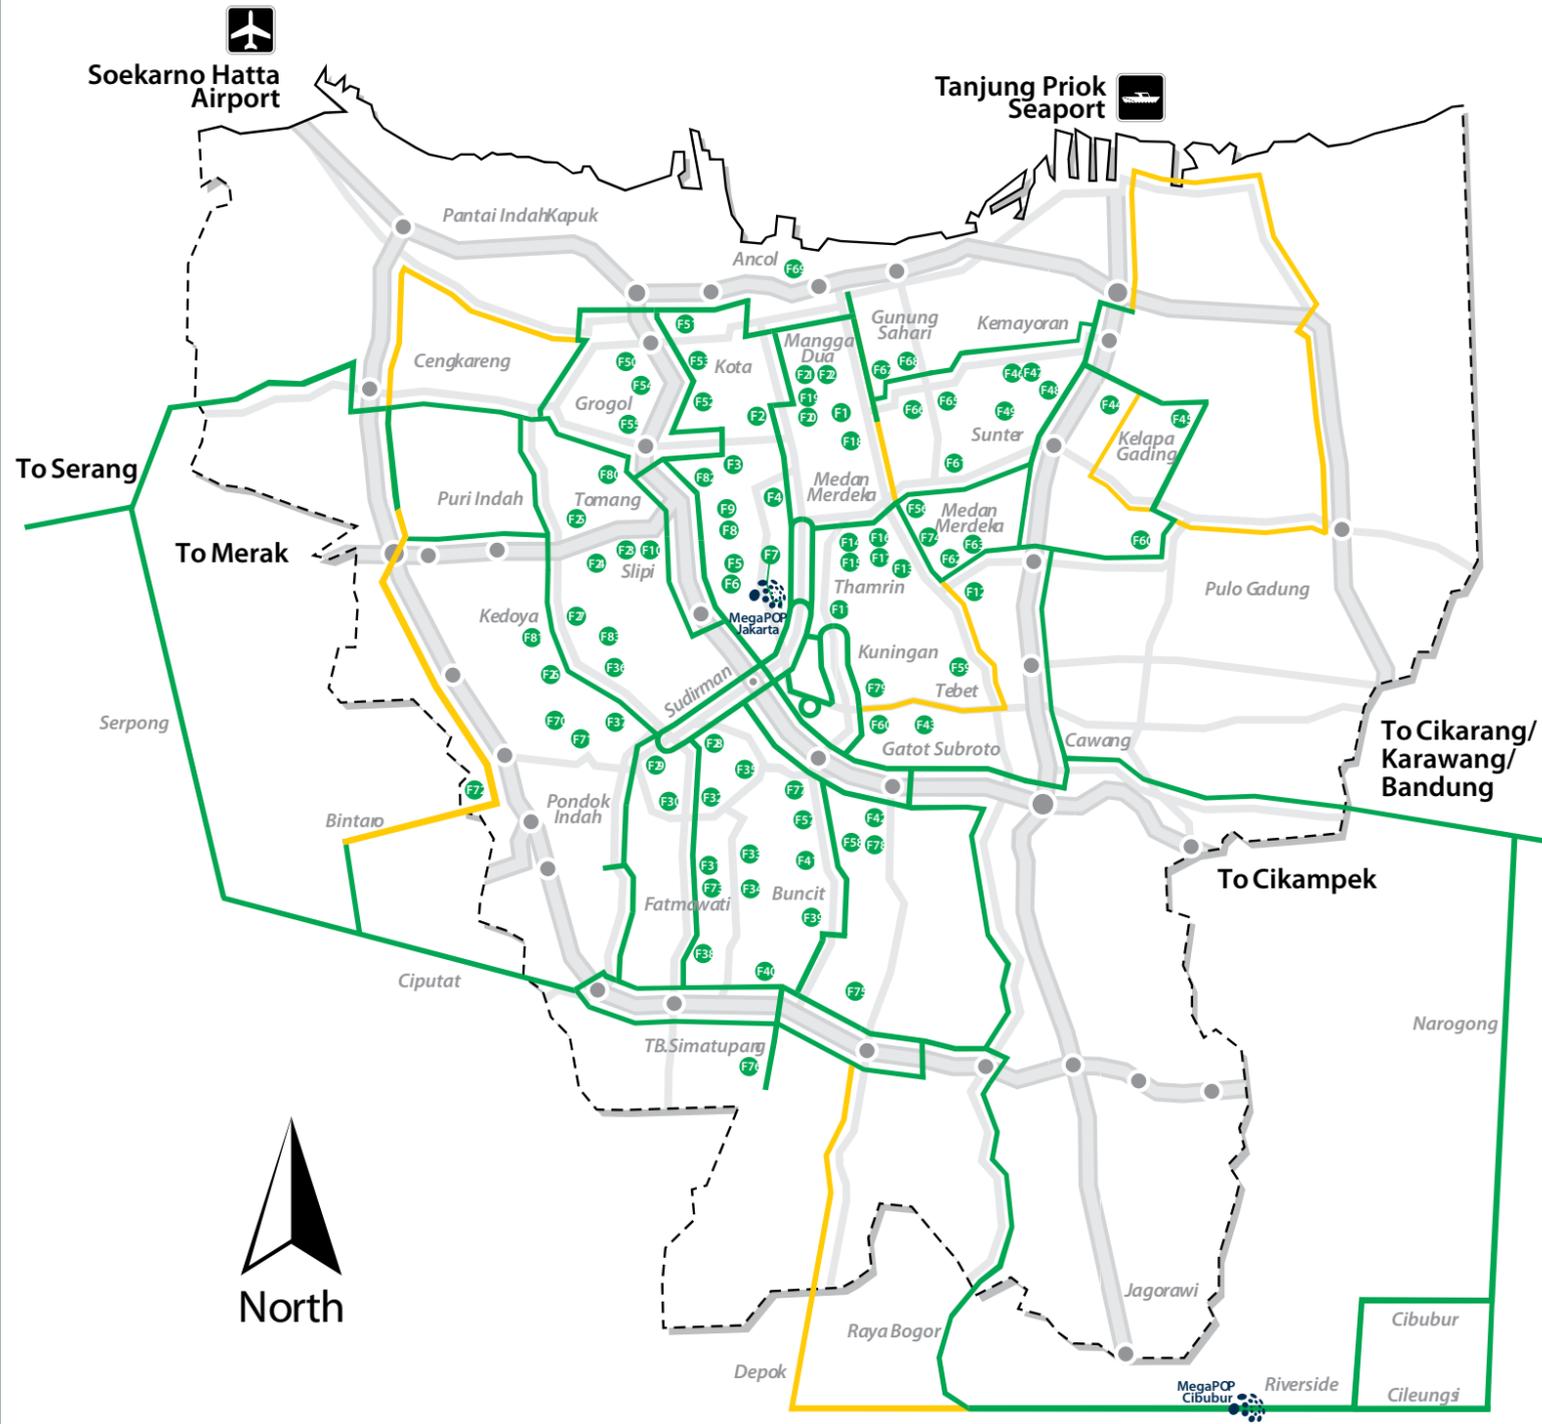

Biznet launches Cloud Computing service and starts Biznet Technovillage Project, a Tier 3 Data Center located in Cibubur, West Java.

6 Cities, 103 District, 400 Buildings, 2500 KM Fiber Optic route

Global IP Transit

Internet has become a critical network infrastructure to support business application as well as personal communication. Both business and residential users demand the best service, network performance and pricing to accommodate their requirements. To support those requirements, Biznet Global IP Transit Service is the best choice for stable and robust solution.

As one of the leading telecom infrastructure company in Asia, Biznet offers Global IP Transit with redundant equipments, ultra high-speed connections to all the major Internet backbones and Internet Exchanges, and ensuring routing and bandwidth allocation available at all time. Biznet Global IP Transit is the best choice for you and your customers.

Biznet Global IP Transit services provide direct connection to multiple Global Tier-1 Internet Providers and leading Internet Exchanges in the world. Using our service removing the hassle to negotiate direct peering agreement with major content providers in Asia, Australia, Europe and North America.

Proven Performance

Biznet Global IP Transit provides you with a superior Internet experience. We guaranteed 99.8 percent Service Level Agreement (SLA) uptime, the lowest packet loss and latency, direct connection to major Internet Exchanges in the world using multiple submarine cables as redundancy. Many telecom carriers, ISPs and enterprises have been using this network since year 2000.

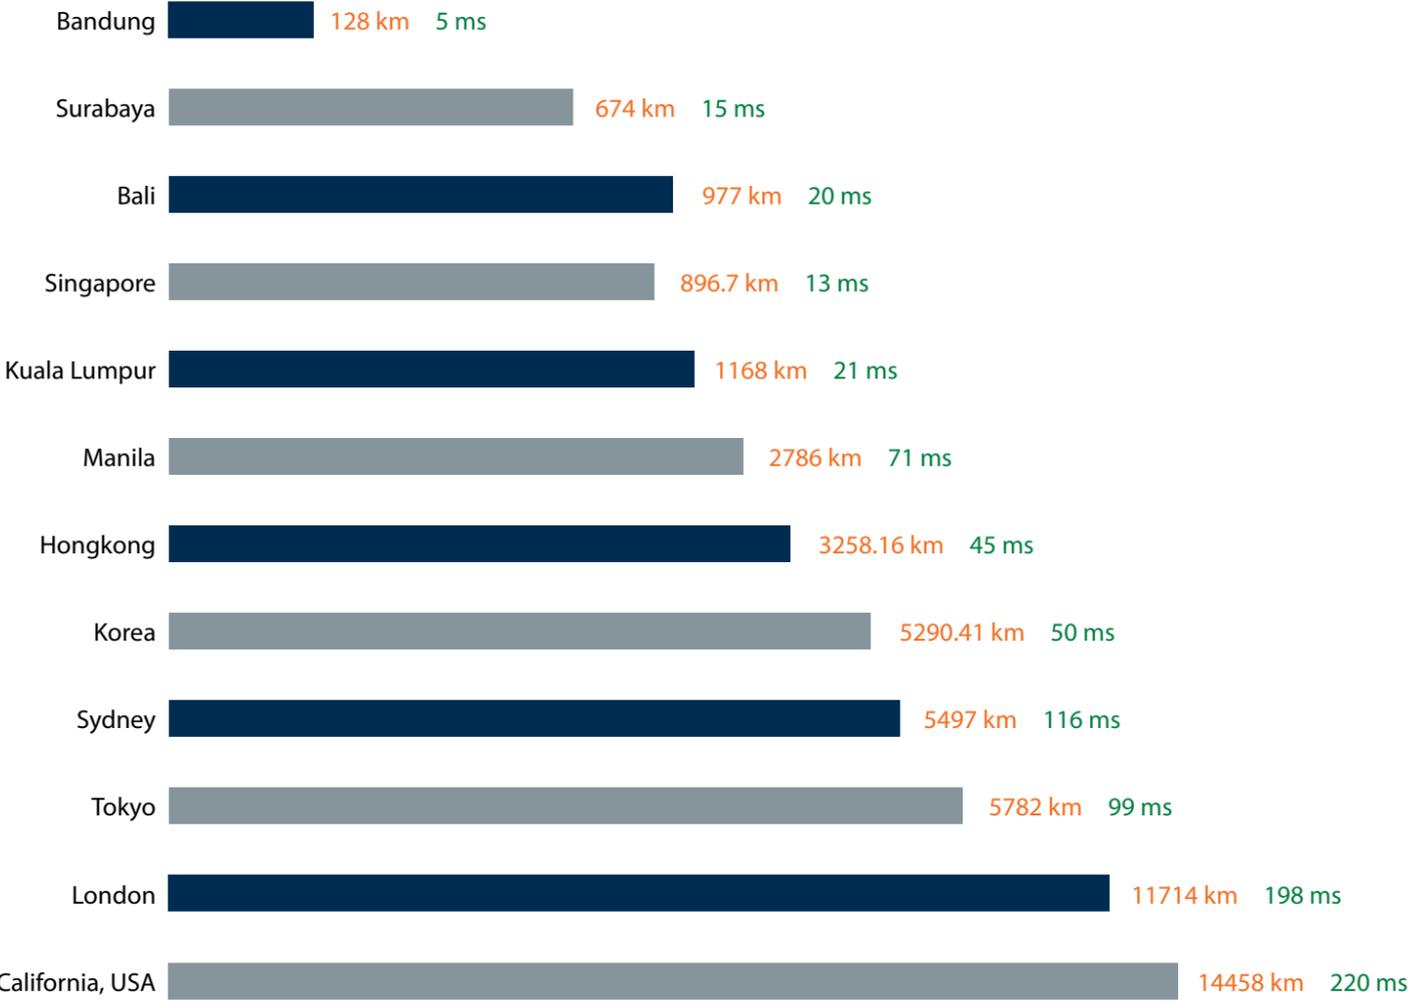

World-Class Premiere Care

Biznet Premiere Care is the heart of our proactive support service to our customer. Network performance constantly monitored 24x7 at Biznet Global Network Operating Center facility in Jakarta, Indonesia. With multiple support level system to ensure all the issues resolved quickly and effectively to minimize downtime for you and your customer satisfaction.

Global POPs Location

Biznet GlobalPOPs located in Hong Kong - China, Kuala Lumpur - Malaysia, London - UK, Manila - Philippines, Palo Alto - USA, Seoul - South Korea, Singapore, Sydney - Australia and Tokyo - Japan. Biznet is actively expanding our GlobalPOP coverage.

From Jakarta

Website you usually visit:

www.inilah.com = 0 ms www.kaskus.us = 0 ms www.detik.com = 1 ms

Distance Ping time

Ping times above are the average of total time spent in reaching the destination from your computer through Biznet Network in normal condition.
Ping time indicated in milli-seconds (ms), 1 ms = 1/1000 second

Biznet Networks has direct connectivity (Direct Peering) to major cities and Internet Exchanges in the world to minimize the route to reach destination for shorter hops.

- Facts:**
- Ping stands for Packet Internet Groper which created by Mike Muss in 1983
 - 'Ping' inspired from active submarine sonar which usually makes ping noise as it meet an object.
 - 'Ping' has the analogy when sending a package of data; it will receive a package of data too as a reply.

Why Do You Choose Biznet As Your Provider?
