

PRESS RELEASE

Biznet and the Government of Kupang Sign an MoU in Providing Internet connection in Kupang

Jakarta, Indonesia 18 May 2021 – Today, Biznet has signed a Memorandum of Understanding or MoU with the Government of Kupang as Biznet's first step to start its network expansion in Kupang. Not only that it marks the beginning of a good collaboration between Biznet and the Government of Kupang, the MoU signing is also part of Biznet's commitment to provide a fast and stable Internet connection to support digital activities for more people, in more cities and regions in Indonesia.

As an integrated digital infrastructure company in Indonesia, Biznet continues to expand its network to more areas in Indonesia, whereas Kupang is listed as one of the priorities for network expansion in East Nusa Tenggara Province. The company's plan to expand the network to Kupang has been receiving positive responses from the City Government, who gives their full support so that Biznet can start with the expansion process immediately. Based on the plan, Biznet will start the process of infrastructure development and network expansion in Kupang on the third quarter this year.

"We are highly grateful for the support given by the Government of Kupang, so that we can start the process of expanding our network in this city soon. As an Internet service provider, we focus on bringing fast and stable Internet services to the public, where we know that there are currently a lot of activities that need to be carried out online, which requires the support from a stable Internet connection. The good collaboration between Biznet and the Government of Kupang also includes Biznet supports in providing free WiFi connections in various places and public facilities, including places of worship. In the future, I hope that Biznet can be the best solution to answer the growing demand for Internet services in Kupang," said Adi Kusma, President Director of Biznet.

As the capital city of East Nusa Tenggara province, which is the central city for industrial segment, Kupang certainly requires adequate infrastructure availability, especially in terms of communication networks and Internet connections that will support people's daily digital activities. To continue supporting many people in building Kupang City in all major sectors and industries, Biznet is expanding its coverage, with a hope to be able to inspire more people to take good use of the available Internet connection to run many activities that are getting more digital nowadays. Therefore, Biznet will be providing fast and stable Internet services for business segments such as MSMEs, startups and large-scale companies through Biznet Dedicated Internet and Biznet Metronet services. In addition, Biznet will also provide services for homes and apartments through Biznet Home service with several package options to suit the needs of the people of Kupang.

According to Dr. Jefirstson Richet Riwu Kore, MM., MH, Mayor of Kupang, *"This cooperation is extraordinary because usually, people say sorry first and then asking for permission. But it's a different story for Biznet, because they were asking for permission first to expand their network in Kupang. Thank you for the positive gesture. Kupang City Government is grateful that finally Biznet is coming to Kupang."*

In addition, the MoU signing between Biznet and the Kupang City Government also includes the provision of free WiFi connections at places of worship. This has become one of the main focuses considering that currently there are many religious activities that must be held online to avoid the transmission of the Covid-19 virus, which is still relatively high in the community. *"We hope that this positive collaboration can continue to be well established, and that Biznet can provide Internet services that can be the best solution to support various digital activities,"* said Adi Kusma, President Director of Biznet.
